Introductory paragraph:

Brain drain
define as & when the educated
people or skilled people leave
their own home country due
and move to an other countries
for better jobs, opportunities,
education, research and development
and better life. This problem
arises most ~~prop~~ probably in
developing countries.
Many Doctors, teachers, engineers
and students leave their
homeland due to these economical
social, technological, political problems.
This is one of the huge / great-
loss for the country, because
there is a huge need of these
peoples for the progress of the
country.
