

9. Is world blind towards the plight of Palestinians?

Outline:

I. Introduction:

Thesis statement: The global players have turned a blind eye towards the sufferings of Palestinians. They will have to recalibrate their policies that are unjustifiably tilted towards the war mongering Israeli state.

II World is blind towards the plight of Palestinians:

A. Continued political support to Israel by global powers.

a. Role of US at UNSC

B. Unhindered economic and military support to Israel by the west.

a. Role of US, UK.

C. World turning a blind eye on Palestinian famine

a. continued aid blockage to Gaza and role of UHF.

D. Sufferings of women in Gaza and role of international feminist organizations.

E. Unchecked advancements in Artificial Intelligence and AI generated genocide by Israel.

a. L.A.W

b. Lavender system.

F. Israel's claim to usurp all Palestine and global silence

a. Trump's remarks.

G. Climate situation of Gaza and continued use of WMDs by Israel.

a. Silence of champions.

H. Global pressure on International Justice Organization for delivering justice.

a. Sanctions and threats to ICC prosecution.

I. Negligence of international media outlets of west and their complicity.

a. Al-Jazeera 2024 analysis.

J. Negligent role of Muslim countries

a. Role of GCC and OIC.

K. Hypocrisy of western countries.

a. capitalizing on Russo-Ukraine war

L. Violations of Human rights in Gaza and silence of global champions.

M. Educational crisis in Palestine and role of global champions of education

N. Complicity of International tech companies in war crimes in Gaza.

a. Operation Nimbus

III.

Conclusion:

"The world will not be destroyed by those who do evil, but by those who witness it and do nothing" said Albert Einstein. His words echo hauntingly in the silenced air of Palestine, for the world is either complicit in Israel's crimes, or at best, they are neutral. It continued to support the Israel politically at every forum. Also, Israel is getting unhindered economic and military support while the Palestinians are grappled in famine. Feminists are silenced on the atrocities of women in Gaza. Moreover, AI companies continue to advance their tech despite continued genocide by Israel using AI tech. International community is also silent on the ill claims of Israel to usurp the Palestinian territory completely. Furthermore,

Muslim nations are also negligent regarding the situation in Palestine. The global players have turned a blind eye towards the sufferings of Palestinians. They will have to recalibrate their policies that are unjustifiably tilted towards the war mongering Israeli state.

To start with, global powers continue to support the Israeli atrocities politically.

At every global forum, Israel is backed unjustifiably by superpowers such as USA.

At every United Nations Security Council meeting, the US has vetoed any motion that is against Israel. Even the motion for ceasefire are blocked by US. It justifies its actions by asserting that Israel has the right to defend itself. By saying so, it completely sidelines the fact that the one ^{who} needs to defend itself is

palestine: Israel does not defend itself rather, it is oppressor. Despite all its war crimes - Israel continues to enjoy unhindered political support from global powers.

Similarly, Israel also continues to get unhindered economic and military support. The least that the International community can do is to halt the aid to Israel. Unfortunately, it does not. Recently, British Foreign secretary in the House of Commons condemned the actions of Israel to same face. When the opposition leader rightly said that condemnation only will do no good and UK has to stop its aid support, the secretary declined it by saying that Israel has to defend itself nevertheless. This clearly shows that while the countries in the west

have begun to condemn Israel to save face, deep inside, their criminal support to it continues.

Moreover, Famine has now grappled the Palestinians. Children are more at the risk. As per UNRWA, children are now dying at the rate of 22 per day. The Secretary General of UN has termed this situation as 'man made famine'. Furthermore, UN has also designated the situation as the 4th famine in the world history. Despite that, efforts to deliver aid to Gaza are nowhere to be seen rather, accomplices of Israel are taking advantage of the situation. Aid blockage continues in Gaza. 'Gaza Humanitarian Fund' made by IDF (Israel Defence forces) use the aid trucks to attract the hungry crowds and then shoot at them. Workers of the Red Cross verified the news. Therefore, world is silent on Palestinian famine and

Israel continues its atrocities.

Furthermore, women continue to suffer at the hands of Israeli atrocities in Gaza.

In such situations women are most vulnerable. Whether it be the chaos at aid trucks to get a ration bag or taking care of hungry children crying for food, women continues to suffer in Gaza. Alarmingly, Medical workers at Shifa Hospital in Khan Younis, Gaza told the reporters of Al-Jazeera that at numerous times, they treated raped women by the IDF soldiers. Unfortunately, those who champion for the rights of women in the modern streets of Europe, continue their silence regarding the situation of women in Gaza. Hence, global feminists are reluctant to condemn women atrocities in Gaza.

To add on, Israel is committing the first ever

AI generated genocide in Gaza, but the advancements in AI continue to grow unchecked.

Israel is using lethal Autonomous weapons in Gaza. One of the examples is the Lavender system. This system marks the enemies and eliminates them without any command. It launched an attack on Jabalia refugee camp in Rafah by marking all innocent refugees as Red. As per UNRWA, children were also killed. Such alarming is the unchecked and unethical use of AI. Unfortunately, AI tech moguls continue their unregulated advancements.

Recently, Israel has unveiled its plan to immediately take control of all of Gaza and West Bank. This development comes after some of the western leaders announced to recognize the Palestinian state under the pressure of growing protests.

In response, BB Netanyahu showed his plan to annex

all of Palestinian territory. He said that they are doing this so that nothing will be left for the world to recognize. However, when a reporter asked Donald Trump about his thoughts on the development, he shrugged and said that it depends on the Israel. Such is the negligence of global powers regarding Palestinian issue.

Additionally, climate situation continues to worsen in Gaza. Israeli has bombed the Gazan territory so much that amount of toxins and sulphur have increased in the air. This causes more diseases in already famine stricken people of Gaza. While climate activists around the world leave no stone unturned in condemning actions that are against the environment and are degrading it, they continue their criminal silence regarding the

situation in Palestine. One of the examples is 'Save Earth Society' which is more active in Europe. Hence, when the question of climate situation ⁱⁿ of Gaza comes, activists are silent.

Unfortunately, those who dare to do justice regarding the situation in Palestine, are faced with enormous pressure. One of the examples is of International Criminal Court. Upon the petition of South Africa regarding war crimes in Gaza, ICC issued arrest warrants of PM Netanyahu and ministers of his war cabinet. Upon these convictions, the compliant states of Israel started pressuring the ICC. The prosecutor of ICC, Karim Khan, was sanctioned by USA. Furthermore, AIPAC (American Israel Public Affairs Committee) funded senators uttered derogatory remarks regarding the prosecutor. Such is the compliance of the world regard in Israeli crimes.

Surprisingly, the same media outlets that condemn the actions of Russia in Ukraine, were seen with Israel's side. Western media outlets such as BBC, CNN, and Fox News condemned Hamas. They completely ignored the actions of Israel. As per an analysis done by Al-Jazeera, these very outlets condemned the actions of Hamas, but when far heinous crimes were committed by Israel, they used passive voice to report. For example, 'childrens were killed' instead of 'Israeli bombings killed children'. This clearly shows that media is also complicit in war crimes of Israel.

Moreover, Muslim countries are also negligent regarding the Palestinian situation. It is the primary duty of Muslim nations to defend Islamic countries for Islam.

let alone doing it for morality. However, their actions are in contrast. While the trillion dollars deals were done between Saudi Arab and USA, Palestinian question was not discussed at all. Similarly, Organization of Islamic countries, or simply the OIC, has done nothing but condemning the actions of Israel so far and urging them for restraint. The above actions clearly reflect the negligence of Islamic countries regarding Palestinian issue.

Furthermore, western countries claim to be always on the right side. Unfortunately, in the case of Palestine, their hypocrisy was visible. When Russia invaded Ukraine, all the countries started condemning it to every extent. When similar actions were done by Israel or far worse than those committed by Russia, their response was different. It looks

the killings of 54000 children for the world is just push for ceasefire. Condemning Israel for its actions and making it accountable for its actions will take far more deaths as history shows. An American analyst said that they sided with Ukrainians because they were 'white educated people'. Such is the level of ignorance and hypocrisy of world.

Similarly, human rights champions are also silent at the atrocities done by Israel. Destroying civilian infrastructure, mass killings, dehumanizing prisoners of wars, killing aid workers, and murdering journalists, all are classical examples of human rights violation as per Geneva convention. Despite all that, rights activists in the first world countries are either silent on war crimes of Israel, or with them. When

a journalist asked a rights activists demonstrating in Washington for abortion rights about the Palestine situation, she said that there are not human rights violations because 'everyone in Gaza is Hamas and deserve to die'. Therefore, rights activists have also turned a blind eye towards the plight of Palestinian.

To add on, global champions of education are silent regarding the situation in Gaza. The educational infrastructure in Gaza has been destroyed to the ground. As per UNDP, 100 percent of children in Gaza are now designated as OOSC (out of school children). However, education rights activists are criminally silent regarding this situation. A mother in Northern Gaza said that 'it seems our children are of lesser God'. Such is the situation in Gaza, but champions like Malala were seen silent or

neutral regarding the situation. Hence, those who claim to be the champions of equality in education are silent.

lastly, tech companies and their honours are also complicit regarding in Israel's war crimes. They claim to provide equal opportunity for all through applications like Twitter (x), Facebook, and Instagram.

However, their actions are on the contrary. Grok, AI bot of Twitter, recently showed concern that its owner Elon Musk wants ~~that~~ it not to be transparent regarding situation in Palestine. Similarly, Google and Meta combinedly provided Israel with data to intensify the war in Gaza with a name 'Operation Nimbus'. Therefore, the above evidences clearly reflect how tech companies are complicit in war crimes with Israel.

In conclusion, the global players must resist.

their implicit policies regarding the Israel-Palestine issue and stop their unjustified support. The global powers have already done enough damage to Palestinians by pressuring justice organizations, unethical use of media, hypocrisy, and unregulated use of tech companies. Moreover, Muslim nations must also play a constructive role and support the Palestinian statehood. The world must now stop witnessing the evil actions of Israel and stop the destruction of Palestine, or else it will ultimately become the cause of the destruction of the world as said by Einstein.
