

Is the World blind towards the plight of Palestinians?

Thesis Statement:

The world is turning a blind eye towards the plight and suffering of innocent Palestinians as the global superpowers are complicit in Israel's war crimes, legal loopholes are being leveraged cunningly by Tel Aviv, and Arab nations and Muslim leaders are reluctant ~~due~~ of political expediency, along with other reasons. Thus, the world needs to wake up to this ghoulish reality and forge a permanent ceasefire in Gaza.

II. Conclusion

The World is on the verge of losing its moral compass forever. The international order has made an empty shell out of its principles and values. The world seems to be blind to the atrocities unfolding in Gaza. Starvation and hunger are weaponized by Israel to achieve its political objectives. The Muslim and Arab nations are wishing away genocide, without the requisite action to deter or prevent it. Such is the world of politics where ethics are put on the backburner, keeping 'vested interests' on the front seat. The Arab nations, too, are musing words without action for the people of Gaza. The Muslim nations, too, are wishing away genocide without any meaningful action against Israel. However, the world has not been completely overshadowed by the evil. The forces of good are still emerging.

In the form of growing trends in the European countries against Israel. EU and US have jointly criticised Israel and might cut funds to Israel in the near future. Moreover, the growing public opinion against the genocidal war machine of Israeli forces is growing louder than ever. Global Sumud Tishlaa aims to provide humanitarian aid to Gazans. The UN General Secretary has declared 'famine in Gaza'. Thus, the world is turning a blind eye to Gazans as the global superpowers are complicit in the war crimes of Israel. Thus, the world needs to wake up to this grotesque reality and forge a permanent ceasefire in Gaza collectively and immediately.
