MOCK EXAM

NAME: NOOR FATIMA.

Reg. No: 39188.

Batch No: RWP OB-069.

SUBJECT: ENGLISH ESSAY

Topic:

Is the world blind towards the plight of Palestinians?

Outline

1- Introduction

a- Hook

b- General Background

c- Thesis Statement: Since 7 Oct 2023, the sufferings of Palestinians have expedited due to the ethnic cleansing by Israel and demolition of their political, economic and social fabric. However, the world has turned blind towards their critical circumstan-

ces which may also include media hostility, Israeli war crimes, injustice to Palestine and impunity for Israeli criminals.

2- Blindness of world towards ethnic cleansing of Palestinians by Israel.

a- Continued bombing with international support
Example: Israeli bombing is equivalent to six 'Hiroshimas': Prof. Paul Rogers, Bradford university

b- imposed famine
IPC report: people living in Gaza city experiencing famine conditions of 'starvation, destitution and death'.

c- President Trump's Gaza migration plan.

3- Blindness of world towards the political instability in Palestine.

a- Gaps in Hamas of Gaza and Palestine Liberation Organization of West bank.

Case Study: No role of OIC in bridging the gap

b- killing of key officials of Hamas

Case Study: Yahya Sinwar and Ismael Haniyah, killing with international support

4- Blindness of world towards economic plight of Palestine.

a- depleting human resource.

b- economic crisis due to the demolishment of key infrastructure

Case Study: Only 19 out of 36 hospitals are partially operational in Gaza (WHO).

5- Blindness of world towards the demolishment of social fabric of ~~Gaza~~ Palestine.

a- Education

University World News: 90,000 students have lost access to HE in Gaza till January 2025.

b- Health.

c- Displacement in West Bank.

Case Study: January West bank

operation led to largest displacement since 1967 war : UN.

6- Blindness of world towards media hostility of Israel in Palestine.

a. Target killing of media persons. gains no international empathy

Case study: More than 200 media personals killed by Israel since 2023 (Dawn)

b- Forced evacuation of media persons.

Case Study : Motaz Azaiza, a photographer journalist's evacuation.

7- Blindness of world towards the war crimes of Israel in Palestine.

a- In-humane behavior with captives

b- Sexual assault in war.

c- Mass killing of children.

8- Blindness of world towards international injustice towards Palestinians.

a- hatred towards Palestinian by Zionists.

Case Study: US mar attack on a Palestinian boy Waleed Alfayumi and his mother (BBC).

b- Brutal arrest and visa-cancellation of Palestine protestors.

Case Study: Trump administration crack down against Palestinian protestors.

9- Blindness of world towards the impunity of Israeli criminals causing Palestinian plight.

a- Unarrest of war criminals enhance Palestinian plight.

Case Study: Despite ICC's arrest warrants, Prime Minister Netanyahu was not arrested in Hungary (ETIH).

b- Nationality-based privilege and impunity to Israelis in world.

Case Study: Release of US-based Israeli official 'Alexandrovich', charged

as 'child sex predator'.

10- Conclusion.

The Essay

Palestine, the land of prophets, has thousand years' history, with the ownership claim of different nations. From the victory of Hazrat Taloot to Titus and Bakht Nasar's autocratic era, Muslims had gotten the rule of Palestine during the time of Hazrat Umar (R.A): second caliphate of Islam. However, their rule was challenged with the establishment of a parallel Zionist state called Israel in 1948. Since then the sufferings of Palestinians began and are continued till today. After the Hamas - Israel conflict on 7th October, 2023, the war has continued to destroy the Palestine from all dimensions. And above that, the

criminal science of 'highly-moral' world particularly Muslim states has enhanced their grievances. Ethnic cleansing by Israel, demolition of ~~Israel's~~ Palestine's political, economic and social fabric and killing of media persons has just enhanced the rhetoric in world without any practical action. In addition, the ^{ignorance towards} war crimes of Israel, international injustice to Palestine and impunity for Israeli criminals indicate the biasness of world towards Israel. Therefore, world has become blind towards the plight of Palestinians.

To begin with, ethnic cleansing of Palestinians by Israel is crystal clear in the technological era. From graphics to live coverage, the brutality of Israel echoes in every part of the world but its silence is incomprehensible. Israel

has continued to bomb Gaza since 2023. According to Professor Paul Rogers from Bradford university, Israeli bombing in Palestine has become equivalent to six 'Hiroshimas'. Can a small country like Israel continue it without international support. As per US department of state, delivery of \$4 billion in military aid to Israel has been expedited in March 2025. Besides bombing, Israel has continued the ethnic cleansing by imposing 'famine' in Palestine. No aid is allowed there. As per IPC report, at least 2 in every 10,000 people are dying in Gaza due to starvation and Malnutrition. Despite the acknowledgment, there are no practical steps to enforce Israel and stop this brutality. Even Muslim countries like Jordan had fulfilled their responsibility by throwing aid boxes

3)

from jet planes. Above all, this TO ethnic cleansing and siege is further endorsed by international leaders like USA prime minister Donald Trump. He devised a migration plan for Gazans towards Egypt, Jordan and Lebanon instead of sanctioning Israel. Therefore, the criminal silence of world towards the ethnic cleansing of Palestinians by Israel is evident by their actions.

Besides the ethnic cleansing, the world has turned eyes from the political instability in Palestine. Gaza and West Bank are among the few parts saved from Israeli occupation. However, instead of unifying their force against Israel, Hamas in Gaza and PLO in West Bank became political opponents. Resultantly, they became more vulnerable to Israeli oppression. However, the regional platforms like

OIC can bridge the gap and ensure political stability in Palestine. However, no such role has been observed from OIC or other influential countries such as Iran, Saudi Arabia, Qatar etc. In addition, the killing of key political figures of Hamas in 2024 has further widened the gap. Yahya Sinwar, the key planner of 7th Oct 2023 attack and Ismael Haniyeh, the political representative and prime minister of Gaza were killed by Israel in 2024. It enhanced the suffering of Palestinians but no conviction was placed on Israel and its allies. Alongside, no significant measures were adopted sig internationally to end the political suffering of Palestine. It indicates the indifference of world towards the political plight of Palestine.

In addition to political plight, the world has also turned blind towards the economic plight of Palestinians. Massive genocide has led to the depletion of human resources in Gaza. BBC reports the killing of more than 60,000 people in Gaza since 2023. The HR depletion ultimately leads to the deprived economy. Alongside, the demolition of key infrastructure in Gaza further enhances the economic crisis. According to World Health Organization, only 19 out of 36 hospitals are operational in Gaza. In addition, the destruction of schools, universities, offices deprive thousands from job. Resultantly, people had to rely on aid which is also not allowed by Israel. However, the world has continued to report these sufferings without any action. Neither Israel

is charged for bombing nor for maintaining an open air prison. So, the actions prove that world has turned silent towards the economic plight of Palestinians.

Alongside the economic grievances, the world has stayed indifferent of social fabric demolition of Palestine. Human Development index (HDI) of any society is based on education, health and peace. In terms of education, Palestinians are deprived from it due to the destruction of educational infrastructure and massive killing of students and teachers. According to university World News, 90,000 students have lost access to higher Education in Gaza till January 2025. So the next generation of Palestinians, if remained alive, would be uneducated. Alongside,

Q

The health indicator has also fallen below the line in Palestine. As per the Health Ministry of Gaza, death toll from Israeli-imposed famine rises up to 281, including 114 children. Alongside, poor sanitation and low quality drinking water poses negative effects on their health. But the question is raised on the performance of Human and Women rights advocates across the globe. Their activism has changed the fate of human, particularly women across the world but in Gaza, lack of basic feminine and maternity necessities makes no difference on such institutes and moral leaders of world. Furthermore, West Bank is also at the hit of Israeli oppression. As per UN, the January 2025 attack of Israel has led to the largest displacement in West Bank since 1967. So, the peace is nowhere in Palestine. And the world has also been

silent upon the ^{social} grievances of Palestine.

Besides the social oppression, media hostility of Israel in Palestine has also failed to wake the global conscience. Israel has continued to kill the native and international journalists by labelling them as 'Hamas-agents'. As per Dawn, more than 200 media personals have been killed by Israel since 2023. The latest killing Anas Al-Sharief, a veteran Al-Jazeera journalist has raised the wave of sorrow but still the global media agencies and UN has not advanced from the ~~mere~~ words to action against Israel. Even Qatar, the Al-Jazeera Head Quarter, is unable to counter Israeli oppression over its media personals. In the world where Russia and Iran are sanctioned an war

and mere the threat of nuclear weapons preparation, the heinous crimes of Israel are overlooked. Besides the target killing, forced evacuation of media personals is also performed. Motaz Azaiza, a renowned photographer journalist, was displaced from Gaza in 2024. These measures are taken to stop the broad casting of Israel's evil side. But the question is that what the world, especially Muslim countries have done for Palestine while looking at the evidences of Israeli oppression. So, the world has overlooked the media hostility of Israel and plight of Palestinians.

In addition to media hostility, the war crimes of Israel in Palestine are deliberately overlooked by the world. The in-humane behavior of Israeli forces with

Palestinian captives comes under the war crime. In 2024, the world had seen the contradicting physical and mental condition of captives released by Israel and Hamas. Still, the western media claims Hamas and Palestinians as child killers and rapists. Whereas, the sexual assault has become a common war crime for Israeli occupation forces. As per Al Jazeera, an IOF soldier raped an old woman with his dog. But such heinous crime ^{could} ~~did~~ not raised another Muhammad Bin Qasim from Islamic world. Furthermore, the children of Gaza were also labelled as 'Hamas agents' and are still killed. According to BBC, most of the people killed by Israeli bombing are children. So, the war crimes of Israel and suffering of Palestinians is increasing day by day but world is silent and has turned blind.

The list of Palestinian plight and world's criminal silence does not stop at war crimes of Israel. Instead, it echoes in the injustice and unfair treatment of Palestinians at international level. The Zionist regime has continued to show hatred towards Palestinians. As per BBC, a Palestinian boy Wadee Alfayoumi and his mother were brutally attacked by a US man. This incident is evident of the unfair treatment towards Palestinians.

Besides Palestinians, their supporters are also facing injustice. Trump administration, for instance, has begun the brutal arrest and visa cancellation of Palestinian protesters. In addition, UAE has convicted three people for the anti-Israeli rhetoric in 2024. Even the Islamic republic of Pakistan did not allow the

pro-Palestinian protests, led by Senator Mushlag in Islamabad. Despite their claims of security reasons and peace in countries, these actions have spoken louder than words. The world has not remained silent in treating Palestine and its supporters unfairly and unjustly.

A step ahead, the world has added more to the plight of Palestinians by providing impunity to the war criminals of Israel. The internationally acknowledged ^{Israeli} war-criminals are supported by world. As per EIJL, Hungary had not arrested Israeli Prime Minister Netanyahu in his April visit despite the arrest warrants of ICC. The silence of world is evident. Alongside, Israelis are enjoying nationality-based

privileges and impunity in the world. For instance, US-based Israeli official 'Aleksandrovich' has been charged as 'child sex predator' in August 2025. However, he was released soon without conviction on the basis of his Israeli-nationality. So, the world has remained active for Israeli force and silent for Palestinian plight.

To conclude with, Palestinians have been suffering of ethnic cleansing by Israel and ~~the~~ political instability, followed by economic and social degradation.

In addition, mass killing of media personals, war crimes of Israel, injustice to Palestinian identity and support for Israeli criminals have further enhanced their plight. However, the real

scorn lies in the dead
conscience and criminal silence
of world particularly Muslim world.
It has enhanced the plight of
Palestinians by abetting Israel's
heinous crimes. However, the
world should remember that
story won't end with Israel and
Palestine. This criminal silence
would raise many tyrant nations
that would follow the footsteps
of Israel. So, the blindness of
world towards Palestinian plight
is evident yet the precedent
for future tyranny.
