Once perceived highly, the civil service in Pakistan has become a hodge-podge of public service combined with social media influencer lifestyle. Firstly, there are those who seek to maintain a level of influence in society while making a stable income; perks not offered by the private sector. Then there are those who carve this career path to their self-worth, ~~running~~ themselves into the ground in the process. Then there are civil servants ~~parading~~ as social media influencers. Emphasis is placed on appearing, and posing as a bureaucrat rather than ^{doing} the actual administrative work. Resultantly, the impression given off is that of a glamorous lifestyle rather than the grueling and often mundane reality of public servants. Yet in a country like Pakistan, perceived power is often just as, if not much more powerful than the real thing.

Ultimately, the image of civil servants, both on and off screen, has become as influential as their actual authority.
