Introduction:

As the peace deal in Palestine looks implemented at present and in the foreseeable future, the most affected region by war in the world is now Ukraine. Despite its small size in comparison to Russia, it got weapons and financial assistance from European Union and USA to keep the war going against Russia. NATO unable to jump direct in war feels reluctant to give military soldiers support to Ukraine due to danger of World War III. There are chances to end Ukraine war if Ukraine accept condition of neutrality and ~~may~~ leave its desire to join NATO. Russia is bound to win the war which will be discussed in the following paragraphs.

Chances of the end of Ukrainian War

1) Ukraine accept condition of Neutrality.

Condition of neutrality like it happened in Georgia then Peace is predictable in Ukraine through deal and Russia will back off.

2) Russian Speaking territories in Ukraine

The demographic of Ukraine are in favor of ~~Ukraine~~ Russia because adjoining regions to Russia are Russian speaker and would join Russia. Therefore, Ukraine can't fight Russia for long and neither expect Russia to stop war without achieving its objectives.

Russia previously USSR has strong military and economic capacity to keep fighting longer than Ukraine. European Union and USA have internal issues to face on too which left Ukraine with no option but to accept Russia's condition of neutrality.

How Pakistan could balance its relations after the recent engagement with US and strategic partnership with China.

Introduction:-

Pakistan share long history of relationship with both China and USA after its creation in 1947. On one side, China is a strategic partner of Pakistan. From 1963 onward, ~~the~~ after deteriorating relation with India due to war in 1962. China and Pakistan find a common enemy in India. Therefore both countries support each other on ~~an~~ every level.

China support to Pakistan to become nuclear power and this century biggest project CPEC of BRI Belt Road Initiative are evidence of China-Pakistan economic partnership and brotherly relations. On the other hand, Pakistan share history with US which is not very smooth. From fighting for US in Afghan War against Soviet Union to support US in War on Terror, Pakistan tried to be proved as a trustworthy friend. But US national interest and its tilt toward India made it clear to Pakistan that these were just interest specific relations. US remain ignorant in acknowledging the sacrifices of Pakistan and blamed Pakistan for double game. By having these history lessons, next few paragraphs will discuss how to maintain balance between US and China.

1) Pak-China Strategic partnership.

Pak-China partnership goes back to 1960s. China is indeed a great friend of Pakistan however, too much reliance on any other country especially the top economy of the world can endanger ~~sovereignty~~ of Pakistan and can backfire. Despite China investment in CPEC in Pakistan. Pakistan has to pay back all the loans that were invested in Pakistan. Initially and immediately, Pakistan will have good infrastructure, good roads and economic boost. But in international relations, a country always has a national interest at its core. China is developing CPEC for its own interest such as exporting through shortest route rather than long and insecure route of South China sea. Also China will import oil and gas from Gulf countries which would be cheaper. Recently, India and China shows soft attitude towards each other which can threaten Pakistan national interest. Pakistan and China are long standing partners and will remain. But Pakistan must explore other options to meet its national interest. Therefore, Pakistan has to clarify one thing to China and Pakistan like China is also a sovereign state and will prioritize its national interests just like China.

Recent Engagement with US

Despite having turbulent relations in the past but Pak-US have shared decades of experience together in wars and proved victorious or successful in those wars. The recent diplomatic engagement of Pakistan with USA is a hope of better future relations. US President Donald Trump mentioned Pakistan officials many times at different occasions in respectable and appreciable manner. Pakistan officials visit to White House many times shows positive relationships between two. But as we discussed in case of China, US interests are also prominent. US need a country in South Asia to make balance of power with its economic rival China and ideological rival Iran. Due to recent trade war, US-China relations also deteriorated. However, Pakistan can also take benefit from all this situation by creating a balance between two. Pakistan recently welcomed Iran President, which was surprisingly didn't offend US this time unlike past. Pakistan had made it clear that it will follow its foreign policy which has national interest at its core. just like any other country.

Conclusion:-

20. After long period of time
Pakistan can maintain balance between
its relation between super powers - US and China.
by prioritizing its own national interest rather
than deteriorating relations with one due to
the other one. Both US and China are looking
towards Pakistan as a befitted beneficial friend
Therefore Pakistan has to do the same.
