You are talking about nature while the asked part is the natural resources. Both the terms have a huge difference .

Must work on your topic comprehension

Improve your phrasing

Word selection must be improved

Must attend the tutorial session for further suggestions and mistakes

World is full of natural resources, created by Allah Almighty for human beings to survive and make better use of them. Air to breathe, water to drink, soil to live, and sunlight to obtain energy. By using these natural resources men have brought huge progress in modes of life by creating different things.

Don't switch the tense

This has changed the world pattern, making developing countries more progressive. This shows that natural

resources are blessing. They are supporting elements of life and play role in economic growth of countries by attracting foreign direct investment.

Moreover, they are enhancing technological progress as well as increasing connectivity in the region, ensuring good relations among countries.

Furthermore, promoting national development of countries in different sectors. Additionally, they are reducing poverty and creating jobs in country, also reducing pollution by adding oxygen

the environment by plants. Natural resources are blessings by all means. They play great role in economic, social, political, environmental, cultural, and technological development of countries. **Introduction is not up to the mark. Improve your style of introduction level.**

Natural resources are supporting elements of life. They play an important role in **The** survival of biodiversity. Air is a natural resource which is used by plants and animals to breathe. Water drink by animals to live alive and use by plants to grow. Sunlight, which is obtained from the Sun, keeps animals warm and helps plants in the process of photosynthesis.

You are talking about nature not about natural resources. Besides, the argument is substantially low

Atmosphere / Air contains about 21% of oxygen which is used by plants, animals, and humans for breathing. Natural resources are essential for survival, they are blessings.

Natural resources promote economical growth of countries by attracting foreign direct investment. They are blessings because the country which is rich in natural resources attracted by ~~developed countries~~ **Grammar mistake** and they invest huge amount of money in the country by gaining profit. and the country with resources also gets profit and its economy grows. By foreign direct investments, creating more jobs for the people, which reduces poverty and unemployment in the country. China's massive investment, in Pakistan through CPEC (China - Pakistan Economic Corridor) boosted Pakistan's energy sector, adding substantial capacity and creating jobs, contributing to 2-3% to annual GDP growth at its peak. Natural resources attract foreign direct investment which grows economy of a country.

To conclude, natural resources are the major factors which are essential for the development of countries.

They are making countries more progressive socially, economically, culturally, environmentally, politically, and technologically. Natural resources promoting national development of countries in different sectors, reducing poverty, and create jobs. They are promoting culture in countries and creating natural beauty in environment, connecting to nature. ^{Natural resources} They are blessings because they are source of raw material and creating renewable energy (wind, solar, hydropower, biomass). Natural resources are the gift of nature. Countries with ^{more} natural resources are blessed, they get many benefits and boost their economies by making proper use of them. Natural resources are blessings when they are used properly, they make the world more progressive.
