

General instructions to be followed to pass essay

1- Spend time on rightly comprehension of the topic, you won't pass the essay unless and until you addressed the asked part

ESSAY
Agricultural decline in Pakistan and How to Counter it.

Outline

2- Try to make your main heading in the outline from the words in the question statement

I. Introduction.

Thesis Statement: Pakistan

3- Try to add hook in the introduction. The length of introduction must be of 2 sides

Agricultural Sector is declining due to several reasons. However, These challenges

4- your topic sentence in your argument must be aligned with the ending sentence

must be countered for the agricultural sector development of Pakistan.

5- Avoid firstly, secondly, thirdly etc. in outline

II Agricultural sector is the backbone of Pakistan economy.

6- add references in your arguments with proper source. Go for diversification of references

III. The reasons behind the agriculture sector declining in Pakistan

7- Do not add new idea or point in Conclusion

8- You won't pass the essay if make more than 4-5 grammatical mistakes

A) Conflicts between center and provinces are declining the agriculture sector.

9- outlines that are not self explanatory or does not aligned to with the essay statement are liable to mark 0 and the essay would become null and void

B) Water disputes between provinces due to shortage of water.

10- always try to be relevant to the topic, if even your 1 or 2 arguments are irrelevant, the examiner would not pass your essay.

C) The declining of ^{India} ~~India~~

Water treaty is declining
the water of western rivers
in Pakistan.

D) Natural disasters affected
Pakistan agricultural sector in this decade.

E) The huge prices of fertilizers
and pesticides affecting
the development of agricultural
products.

F) Colonies and housing societies
shorting agriculture land in Pakistan.

G) The decline of Kabul
river is the main reason behind
the decline of agricultural product
in Kyber-Pakhtunkhwa.

iv) Suggestion for ^{the} agricultural
sector development of
Pakistan.

A) Pakistan solved ^{the} Indus water
treaty issue in United Nation.

B) Pakistan pressurized India
through China in Shanghai
Cooperation Organization.

c) Councils of common interest must solve the conflicts between center and provinces as well as ^{solved disputes} between the provinces.

d) Governmental subsidize of agricultural raw material products is fruitful for the development of agricultural sector in Pakistan.

e) Storage of water in summer is fruitful for main crops in winter.

(v) Conclusion.

You haven't understood the topic at all.

Must work on your topic comprehension

Improve your phrasing

Word selection must be improved

Must attend the tutorial session for further suggestions and mistakes

It seems like your thought process is in Urdu. Try to avoid thinking in Urdu or in your mother tongue

but agriculture sector is more important than all sectors because it is necessary for survival.

Pakistan is the country which economically depends on agriculture sector. Therefore, the development of agriculture sector is more important for the Pakistan development. However, Pakistan agricultural sector is declining due to the decline in the flow of western rivers and Kabul. Further, natural disasters and water disputes between the provinces are restricting the agricultural sector development. In addition to, the huge prices of fertilizers and pesticides and electricity are declining the main economic sector of Pakistan.

Therefore, these challenges in the way of agricultural sector must be eliminated

for the development of agricultural sector. Pakistan ~~must~~ solve ~~the~~ decline of the Indus water treaty bilaterally or in the United Nation. Further, Pakistan Council of common interest must solve the interprovincial disputes. In addition to, governmental subsidies and low prices of raw material can develop the agricultural sector. So, the suggested measures are necessary for the development of agriculture sector of Pakistan.

Central and provincial disputes are hindering the development of agriculture sector. The ^{state} dispute of National Finance Commission between the center and the provinces is dealing the provincial agricultural subsidies. However, the shortage of funds and heavy taxes are ^{impeding} the agricultural sector growth. Central

No Argumentation. You are just providing me the information which is not required

Government is claiming 42.5 share is not sufficient for federal government. On the other hand, Balochistan government is claiming that Balochistan share in national finance commission is shorter despite of its big land. So, Federal and Provincial dispute is hindering the development of agriculture sector in provinces due to shortage of funds and subsidize.

Inter-Provincial water

- dispute between the provinces is the main reason behind the agricultural sector growth. Geographically, Pakistan is locating lower riparian.

In addition to, ~~the~~ geography of Pakistan visualising that Punjab is upper riparian and Sindh and Baluchistan are lower riparian.

However, Sindh government is claiming that Punjab is not providing sufficient for as well as Baluchistan

Government is claiming that
Sindh is not providing sufficient
water for the agriculture sector.

Therefore, The dispute of water
share between the provinces ~~is~~
restraining the development of
agriculture sector. So, The water
disputes between the provinces
must be solved for the
agricultural sector growth

India unilaterally
~~declining~~ the Indus water treaty
is the main reason behind
the shortage of water in
western rivers. ~~According to Indus~~

water treaty "India can't build

**You don't have the Idea regarding
argumentation. Work on your
argument style**

water ~~declining~~ projects on the
western rivers and can't declining

the flow of water". Therefore

India has ~~declined~~ unilaterally

the Indus water treaty. However,
Pakistan is facing many issues

is different sectors due to the decline in the flow of western water but agricultural sector is moving towards worse condition due to the shortage of water.

According to the report of Pakistan Agriculture Sector and Development

"25 percent land has been barren in Sindh due to shortage of water in western rivers". So, The ^{sufficient} flow of western rivers can improve the agricultural sector growth.

Natural disasters ^{more} effected Pakistan agriculture sector in this decade. Flood in 2022 and 2025 has proved more ^{lossful} for agriculture sector in Pakistan.

Further, Pakistan faced many economic loss due to the failure of disaster management systems. Pakistan agriculture sector can't develop and productive

after the some months of flood. Pakistan losted main crops

rice, sugar cane, beans and vegetables in this decade to the floods. So, natural disaster management methods and techniques must be improved for agricultural sector development.

The huge prices of fertilizers and raw material is the main reason behind the low growth of agricultural sector. As the result, the farmers can't purchase heavy machines and raw materials for more growth. So, the agricultural sector growth on per hectare be down.

Therefore, it is necessary for the more agriculture growth that raw materials prices be cheap.

Housing societies and colonies are snatching the agricultural land. As the result, the agricultural product sector is decreasing day

by day. However, people are losing their agricultural land to residential land. According to the report of Pakistan agriculture sector and development in 2024

"Pakistan has lost 0% agriculture land due to housing societies".

So, the limitation of housing societies can increase the development of agricultural sector development in Pakistan.

The decline in the flow of Kabul river is the main reason behind the shortage of water in the some cities

of Kyber Pakhtun Kha. However,

Now Shera, Sawat and Malakand

depends on Kabul river for

the agriculture sector. According

to the agriculture sector of

Kyber Pakhtun Kha "Sawat ^{land} depends

23 percent on Kabul river.

Malakand agricultural land depends

18 Percent but now she's ^{land} depends
88 Percent of Kabul river".
So, The flow of Kabul river is
necessary for the development
of agricultural sector of Kyber-
Pakhtun Kha.

Pakistan is facing several
water and certain other issues
which are damaging Pakistan
agricultural growth. However, suggested
measures are necessary for the
elimination of these challenges.

Indus water treaty
is harmful for Pakistan because
this treaty is providing abundant
water to Pakistan. Therefore, the
India unilaterally decline the
flow of western water by decline
Indus water treaty is more harmful
for Pakistan development even
survival because Pakistan agricultural,
electrical, industrial and food

Sectors depends on western water.

~~However,~~ Pakistan must take ^{any} step at regional as well as international level for the restartment of the Indus water treaty. Pakistan must discuss this issue in United nation against ^{the} India's water politics on western river.

So, the review and restartment of Indus water treaty is necessary for the agricultural sectors growth in Pakistan.

Shangi Cooperation organization is a major regional organization and its decision is binding.

In addition to, both the countries are the member of ~~this~~ organization. However, Pakistan must discuss this India hegemonization on water in this organization.

Pakistan can resolve this western water dispute ~~against~~ India

through China's support because she is strong regional power in this continent. So, Pakistan must take any step for the revival of Indus water treaty.

Council of Common Interest is the major organ which can solve the dispute between the provinces. At the present time, Punjab and Sindh have dispute due to share of water. In addition to Sindh and Baluchistan have water dispute due to share of water. However, Council of Common Interest must solve these provincial issues ~~through~~ the negotiation with the provinces. So, provincial disputes must be solved for the growth of agricultural sector of Pakistan.

Governmental subsidies and low rate of agricultural

medicines and fertilizers can improve the quality and quantity of agricultural growth in Pakistan.

Governmental heavy growth and huge taxes should be decreased and it should settle on the natural of agricultural products rate because farmers could not bear the heavy taxes and huge medicines and fertilizers. So, low medicine prices, low taxes and subsidies on agricultural sector can improve the agricultural product growth.

Pakistan faces floods in summer every year. Pakistan has storage of mini and macro dams. However, macro dams are necessary for water storage. On the other hand, India has ^{more} capacity to store water because she has more macro dams and she is building more and more dams. So, Pakistan

Should build macro dams for the storage of water in winters. Pakistan faces water scarcity in every year and main crops wheat disturb due to shortage of water. So, Government should build macro-dams for the storage of water.

Agriculture sector is the backbone of Pakistan. It is facing several challenges which impacting on its growth. Pakistan agriculture sector is facing water scarcity, lack of funds, inter-provincial water disputes, India's unilaterally decline of water and decline in the Kabul river. These challenges must be eliminated for the development of agricultural sector. Pakistan^{govt} must resolve the inter-provincial dispute on water and must debate water issue in United^{the} nation and Shanghai-cooperation

Organization against india hydro-
Politics on western rivers. In
addition to, Pakistan government
should ^{provide} subsidies on agricultural raw
Products for farmer and should
~~improve agricultural sector through~~
modern technology and innovation.
At ~~conclude~~ ^{intely} ~~conclude~~ concludingly, The
~~improvement~~ in agricultural sector
is necessary for its development
as well as water scarcity must
be change into water abundance.
