3. Conclusion

Natural resources are God
gifted ~~essential~~ **Spelling mistake** in the
earth, they are ~~multinatural~~ **Not clear**
sources present in earth. After
industrial revolution, human ~~search~~
era by era for their survival
and they use ~~natural resources~~ **Grammar mistake**
from those some naturally imbed
on earth and human, some use
by human itself. However, human
~~stones~~ ~~extract~~ **Grammar mistake**
ground which use in making marbles,
countries utilize fossil fuels
for their economy which increase
import export among countries.
other major source of sunlight
help in plants grows which
is essential **Grammar mistake and weak**
human use ~~essential~~ **expressions** waste
as leather in making different
things. Other source is wood
from forest, which use for
furniture, use of cotton crops
in textile for making burlap

clothes. There fore, natural resources are essential for human and plants. These are used in different ways: fossil fuels export different countries, sun use for growth, water use for agricultural, these are discuss below.

Fossil fuels which is non-renewable energy source, countries utilize fossil fuels, it is a

big sources which help in economy, it also use in vehicle for traveling. however countries need

petrol and diesel for their machine which works in industries and petrol also use in transport vehicles. For instance: Iran and Saudi Arab export their petrol to other countries. Hence it is proved that increase its economy to export petrol

Furthermore, the ^{an} other source ~~of~~ ^{is} stones. Stones are naturally present in earth's surface and under ground. It use in different ways, human think and research different stones and marbles which use for building and monument. For example: Taj mahal made up of marble, life long stone. There fore... stones are the resource which help in making shelter for human and build monument for memory buildings.

The other one natural source ^{is} sunlight. Sunlight takes ~~to~~ earth warm and also help in the process of plants growth. However, if sunlight had not existed the plants would not have survived and earth become with greenery. ^{However} plant's growth ^{is}

The other one natural source is wood which gets from forest and plants. However plant and forest gives sheds to life. Similarly they also take earth's normal temperature but when they natural and when they break down due to storms, they can be use in furniture. For example chinot wood use in house's furniture which enhance beauty of decorated houses. Therefore wood is the natural source which use in furniture.

Similarly, other source of natural source is cotton crops, which harvest in field or by natural. However, cotton crops gives benefits to a country for the increase their economy. Cotton use in different industries,

different brand clothes. For instance: Marie B. Brand of clothes Hence, it is proved cotton is essential source to wear clothes.

The other natural source which is most use and essential for human and plant and also animals survival is water. However, water use for drinking, survival for live, it also use in agricultural. Similarly, it also use in generate energy but most use in agriculture and drinking, without water human can not survive their life. ~~For example:~~ It also connection build among countries. For example: India, Pakistan and China, they are connected with each other, they use river system. ^{Sindh treaty agreement.} Therefore, water is the main source which use in agriculture and other systems.

Other natural source of herbs which take from wild forest. However, herbs are use essential and give benefits. In old era people used herbs in home made remedies. They also used in wars when people injured, herbs remedies apply on injury it was healed in few day but in modern era, they also use in medicine which heal externally and externally injuries. For instance, cloves, mints use in tooth-paste, and use in thyroid injection medicine. Hence, it is proved that natural herbs are essential for medicine.

Fruits are also natural resources which help in different ways. Fruits gives nutrients which help for human body. However, fruits use in drinking juices, it also

help human growth. Similarly, fruits improve human memory power, healthy skin. Fruits also improve muscles and sharp eye sight, but when human do not take in fruits they get unhealthy which cause disease. For instance, fruit like dry fruits nuts, almonds which provide nutrients according to World health organisation (WHO).

Therefore, fruits are vital natural resources for human body.

To summarise, natural resources need for human survival in today modern era, human can not survive without them.

However, ~~they~~ those natural resources which are ^{use of} water which built strong connection among countries, other is the herbs are vital source which use in medicine, and also fruits which help in human body which

give nutrients to healthy body.
Human on earth can not
survive without natural resources
which present in earth, when
earth was made up the
natural resources also take place.
However, day by day the
natural resources become need
for human which help for
their survival. Therefore, the
natural resources, when it is used
more it can be harmful but
natural resources are essential
when it is used positively.
