

Title: The Neglected Virtues of Sportsmanship in Modern Sports

The concept of sportsmanship encompasses behaviour that includes a combination of high moral traits such as self control, ~~com~~ courage, respect, and tolerance for opponents. The true sportsmanship strikes a balance among four essential elements: being good forms, the will to win, equity, and fairness. If the balance is not maintained, it can lead to a conflict among four elements that eventually dismisses the idea of sportsmanship. However, the current elite supporting culture puts too much emphasis on winning while discarding the rest of elements. Mostly, these elite sportsmen set the standards on sportsmanship and are considered as role models in society. Score loser, defeated person exhibiting bad sportsmanship, ~~he~~ does not take responsibility of personal actions rather he or she blames the external factors for the loss. Contrary, bad winners, person who wins with having bad sportsmanship, shows unnecessary pride and put down the opponent. Such disrespectful ~~to~~ behaviour of bad sportsman leads to demoralising effects as ~~suggest~~ ~~by~~ also described by ~~Howe~~ Leslie Howe.

Q2:

Q1:

Ans:

Sensationalism in media contributes to public confusion about facts by providing exciting but unverified content. When the unauthentic content spreads, it leads to misleading information. Social media platforms further amplify the misinformation and create environment with rampant rumors, conspiracy theories, and unchecked claims. This translates into situation where public gets confuse in distinguishing ~~facts~~ ~~and~~ between facts and fake information.

Q12:

Media framing of issues provides oversimplistic view of issues to people affecting people's ability to understand complex topic. The oversimplification of multifaceted issues perpetuates binary narratives and polarised views. When a complex topic is oversimplified, people face difficulty in understanding complexities of the topic because their views are reduced from a multidimensional perspective to binary vision. This affects their ability to understand complex topics.

Q3:
