

Q3 → Reading Comprehension:-

- Q1: Answer

It can be inferred that although renewable energy seems to be the solution of environment pollution but in reality it is not much different from traditional fossil fuels. Disposal and recycling of renewable energy resources such as solar panels and wind turbines produce air pollution. Similarly, the material required to produce renewable energy like tellurium, cadmium, lithium in electric car batteries etc produce greenhouse gases which are harmful for environment and are toxic for living being. Therefore, unless the proper solutions of these materials are not introduced and adapted, renewable energy's impact on environment is not very different from non-renewable energy resources.

- Q2: Answer:

Electric Vehicles (EVs) are environmental friendly after the manufacturing as they do not emit pollution unlike the traditional cars. But, the manufacturing process of

EVs use natural resources in high intensity (water and soil) which is already facing environmental stress and shortage. Furthermore, their batteries are made of lithium-ion which require mining and hence produce environmental pollution. Lastly, the disposal of batteries used EVs are toxic to environment. Therefore, EVs are not as environment friendly as they appear to be.

- Q3 Answer

The biggest challenge associated with disposal of renewable energy systems is not having a proper infrastructure needed to dispose and recycle their material. The current system and management is not efficient enough to dispose the renewable energy system after their lifespan ends and thus ends up producing toxic emission and pollution into the environment while disposing.

- Q4 Answer

According to the article renewable energy rely heavily on fossil fuels during its manufacturing and operational phase which is not environmental friendly.

- Q5 Answer:-

The article proposed addressing the limitation of renewable energy to be pollution-free by using effective management of their disposal and recycling and manufacturing process.

Q4 Correct any Five sentences

- (i) I will complete this project by tomorrow.
 - (ii) If I knew the answers, I would have pass the examination.
 - (v) All kinds of stationaries are sold here.
 - (vii) A little elegance is left in this arrogant youth.
 - (viii) The mother was searching of herself in her young daughter.
-

Q5(A) A boy was gathering berries from a hedge when his hand was stung by a nettle. **Smothering** with the pain, he ran to tell his mother and said to her (between his sobs), "I only touched it ever so lightly mother." "That is why you got stung, my son," said she. "If you have grasped it firmly it would

not have hurt you in the least."

(B) Rewrite the following with appropriate prepositions

(iii) He has got through all his hardships in his life.

(iv) Every candidate tries to pull up each voter.
✓ The poor live by their honest wages.

vi The thief did not swear by God.

vii He is leaning against the wall as he is not feeling well.

Q6(B)(iii) Monitor → Financial officer was trying to monitor the sales of a company.

Mentor → He is a great mentor of psychology.

(vii) Beneficient → A is a beneficient of his father in a company

Benefrual → Vitamin C is benefrual for a skin.

Title:-

Politicians And Their Multiple Personalities

Politicians are decisive figures who tends to do anything to appear good in front of public. They do false tactics to get votes. They make false promises to people to work for their welfare. But, once elected they forget those promises. Their personality changes so quickly from one to another to appear .. generous but in reality it is the opposite. It seems like being a leader is now more about the appearance rather than serving the country. (words: 77)
