

Q.2)

Title = The Skills of Politicians

Politicians have a mastery of language and an ability to evade direct answers. When posed a question, they have a variety of tools with which they can avoid further questioning. Another ~~significa~~ unique talent of politicians is the ability to make several promises and deliver on none of them. They further are able to produce a spectacle wherever they go, whether through invoking sympathy or passion. Equally significant is their ability to adapt to a variety of settings and ideas, preserving their image throughout. Thus, the main aim of leadership appears to be the honing of such abilities.

Q.3)

1) Compared to traditional fossil fuels, renewable energy production has an equal, if not greater, impact. Production of renewable energy systems produces a tangible impact on the environment, and certain systems such as wind power yields unique environmental challenges due to its intermittent pattern. Thus, renewable energy production is not a worthy competitor to traditional fossil fuels on environmental impact.

Sun Mon Tue Wed Thu Fri Sat

2) Electric vehicles in concept are intended to be environmentally friendly, however, they are not a comprehensive solution. Production produces high amounts of pollution due to the mining required. If the electricity needed to charge the vehicle is derived from fossil fuels, the positive impact further decreases. Therefore, while they may one day be comprehensively environmentally friendly, the current scenario is not.

3) After their lifespan ends, disposing of renewable energy systems often results in the buildup of harmful waste. The components of such systems often cannot be recycled due to the complexity of the waste or the insufficient infrastructure present. As a result, it becomes challenging to dispose in a method not harmful to the environment.

4) The article suggests renewable energy is not entirely pollution-free during its operational phase due to the inconsistency of solar and wind power. As a result, ~~the~~ fossil fuel plant backup or ~~batter~~ storage is often needed. Both these options ~~the~~ yield their own environmental impacts, such as environmental degradation. Therefore, this phase is not free from pollution.

5) To address the limitations of renewable energy, ~~the~~ the article proposes to acknowledge that renewable energy is not a perfect solution free of any limitations. One must carefully manage the entire process, as well as be realistic in regard to the intended output. Only then will it be possible to address drawbacks.

Q.4)

i) If I know the answers, I will pass the examination

v) All kinds of stationeries are sold here

vi) There has always been a fight between devil and divine

vii) Little elegance is left in those arrogant youth

viii) The mother herself was searching for her young daughter.
