

Q2 Precise:

This passage defines the hypocritical character of politicians, who make big promises during rhetoric while campaigns. On the other side, after election they confuse the nation with defining complex statement regarding their questions. Where they do anything for their interest before election. They even take selfie with wandering dogs in streets and unpopular people of his or her area to gain sympathy. Politicians do whatever they want for their self interest even ~~did~~ during interrogation time they often hide and put in front to their supporters and escape out from scandals.

Total words: 311

Precis words: 92

Title: Politicians and their hypocritical facets.

Q3:

↳ What can be inferred about the environmental impact of renewable energy production compared to traditional fossil fuels?

Ans: The environmental impacts of renewable energy production are undoubtedly immense than what they actually represented. For instance, solar panels require rare earth elements like cadmium and tellurium, whose extraction involves environmentally damaging mining practices. Similarly, wind turbines demand massive quantities of steel, concrete, and rare earth magnets. Manufacturing these components not only generates significant greenhouse gas emissions but also disrupts ecosystems and exploits finite resources. Solar panels and wind turbines ^{require vast land often displacing local wildlife} have finite lifespans, maximum up to 30 years, as they reach the end of their utility their disposal and recycling generate toxic chemicals which are harmful for environment whereas traditional fossil fuels are more vulnerable than renewable.

How far are the electric vehicles (EVs) environmentally friendly?

Electric vehicles which are also lauded as environmentally friendly. However, their

~~The~~ production heavily contributes in pollution. manufacturing process particularly of lithium-ion batteries, requires extensive mining of material like lithium, cobalt and nickel. this mining causes habitat destruction, soil contamination, and high water usage. and their charging EVs come from fossil fuel, their environmental benefits diminish significantly, along with it their disposal further creating challenge for environment to endure its emitting dangerous chemicals.

3) What challenge is associated with the disposal of renewable energy system after life span ends?

Ans: Solar panels and wind turbines, have finite life spans, typically ranging 20-30 years. as they reach to end of their utility, the question their disposal becomes critical and their recycling is not widely practiced often resulting in the accumulation of toxic waste.

4) why does the article suggest that renewable energy is not entirely pollution-free during its operational phase?

Ans: Renewable energy systems are not immune to pollution during their operational phase. The intermittent nature of solar and wind power necessitates backup from fossil

plants or reliance on battery storage and latter of which poses its own environmental challenges, Batteries rely heavily on lithium and cobalt of which have supply chains notorious for environmental degradation and human rights abuses. Therefore, this article suggest that renewable energy is not entirely pollution-free during its operational phase if also depends on non-renewable system.

5. ➔ How does the article propose addressing the limitations of renewable energy?

Ans. The whole article demonstrate the challenges of renewable energy and its limitation like short life and dependence on Battery which is again non-renewable source of energy.

Sentence correction:

ii. If I ^{were} knew the answers, I would have pass the examination.

iii. They cheated on me. I wish I ~~were~~ knew them.

iv. All kind of stationaries are sold here.

vi. Always, there has been a fight between devil and divine.

vii. ~~The mother was searching herself~~

viii. The mother herself was searching for her young daughter.

Q5(A) Punctuate the passage:

A boy was gathering berries from a hedge, when his hand was stung by a nettle, smarting with the pain. he ran to tell his mother and said to her between his sobs. I only touched it ever so lightly, mother. That is why you got stung, my son, said she. If you have grasped, if firmly, it would not have hurt you in the least.

Q5
(B)

Preposition:

ii. I am broke with him because he is a selfish friend.

iii. he has got through all his hardships in his life.

~~iv.~~ ~~through~~ iv. The poor live along their honest wages.

vi. The thief did not swear by God.

vii. You have no right to jeer on the beggar.

Q6: (A) ^{use in own sentence:}
words ~~in own sentence~~

iii. Teacher ask a student draw a blank ^{line} on board
and fill it with suitable words.

i. In intermediate Papers students are allowed
to write answer with black and blue pens.

Q6: (B) monitors, mentors

iii. In class, teacher strict monitors for keep quiet
during visit of higher school mentors

vii. ~~The~~ God is most merciful and beneficent
whereas his things are beneficial for us

Q7.

Ans.

Some of the ~~the~~ students of competitive exams are think^{or} that ~~from~~ only getting view of the book ~~and~~ putting notes under the pillow during night time they will become topper. These are those student who prepare two days and after that they find case of in prayers. The reality is that, there is no way of having magic wand, no any short cut of success. If you want extraordinary results then you have to be hard work like that ~~extraordinary~~ ~~so, whenever~~ ~~time~~ ~~you~~ ~~pick~~ so, whenever next time pick the cup of tea and think of either to go for study or not, keep in mind that, success always come with struggles not with comic.
