In a small village of rural Sindh (Pakistan), Ayesha, a mother of three, struggles to feed her children. Her youngest son, barely two years old has a weak, fragile body and dull eyes that reflect the weakened state. Despite her efforts, Ayesha cannot afford nutritious meals, relying on a meager diet of bread and tea. Her story is not unique, millions of families across Pakistan are facing similar hardship. The issue of malnutrition in Pakistan has been exacerbated due to poverty and weak socio-economic conditions of the people. Poor hygiene and sanitation further increase that issue which leads to food insecurity. Moreover, high illiteracy rate, and numerous
