Final Mock

English (Precis And Composition)

Part II

Q No 2

Make a precis of the following passage and suggest a suitable title.

Title:

Politician's Friend: Serving less to Public and Perfecting Performance More

Precis:

In the grand theatre of governance, Politicians (the actors) that are concerned about integrity. Their unparalleled aptitude shows hyperbolic rhetoric. When they are confronted with simple inquiries they employ an arsenal phrases. They do commitment as sacred cost of promises. (their promises are like autumn) they forget their promises after election. At the political

forum they offer rehearsed speeches and shed crocodile tears and never fail to entertain their audience. It would be bad not to acknowledge their unparalleled talent of self-preservation. They shift political ideologies as snake shed its skin. These antics/politicians reminds that leadership is less about serving people and more about perfecting performances.

Precis Words: 100

Q No 3

Read the following passage carefully and answer the following questions that follow.

Questions:

Q1. What can be inferred about the environmental impact of renewable energy production compared to traditional fossil fuels?

Ans: The environmental impacts of renewable energy production compared to traditional fossil fuel is that renewable energy resources requires solar panels and wind turbines. For that purpose, solar panel require rare earth element like cadmium and tellurium whose

extraction involves environmentally damaging mining practices. Secondly, wind turbines also requires vast quantities of steel, ^{of} concrete and rare earth magnets. However, manufacturing of these components generate significant GHG (Green House Gas) emission. Therefore, it is inferred that there are impacts of renewable energy production compared with ~~old~~ traditional fossil fuels.

Q2.

Q2. How far the electric vehicles (EVs) are environmental friendly?

Ans: Electric Vehicles are considered as environmental friendly but they also poses significant pollution. Firstly, manufacturing process of batteries requires mining of material like Lithium, cobalt and nickel. They causes habitat destruction, soil contamination and high water usage in ~~reig~~ regions that are already facing environmental stress. Secondly, Battery disposal would be further challenge as improper recycling and toxic waste. Therefore, EV have potential as environmental friendly but they are not complete solution to reduce pollution.

Q3. What challenge is associated with the disposal of renewable energy systems after their lifespan ends?

Ans: The challenge associated with disposal

2

of renewable energy systems after their lifespan ends is that solar panel and wind turbines have finite lifespan typically ranging from 20 - 30 years. After they reach at the end of their utility, the question of their disposal become critical. Because recycling of these component is not straightforward nor widely practiced. Therefore, they result in excess of toxic waste. Therefore, there is a big challenge of disposal of renewable resources after their timespan ends.

Q4. Why does the article suggest that renewable energy is not entirely pollution-free during its operational phase?

Ans: The article suggest that renewable energy is not entirely pollution-free during its operational phase. Firstly, the article is not to discredit the value of renewable energy as a critical component in mitigating climate change rather to advocate for a balanced perspective. Secondly, like other issues it has both positive and negative aspects if we shifted toward renewable resources. Their production phase causes many problems to world eco-system that should also be kept in mind before blindly trusting on

that renewable resources will cure the climate change. Therefore, this article suggest that renewable energy is not entirely pollution-free during its operational phase.

Q5. How does the article propose addressing the limitations of renewable energy?

Ans: The article proposed beautifully addressing the limitations of renewable energy. that firstly, this article is not to devalue or discredit the value of renewable energy as a critical component in mitigating climate change. Secondly, it proposed to advocate for a balanced perspective. Because, blindly trusting on the renewable energy resources would risks the importance of improving energy efficiency, reducing consumption and diversifying the energy mix. Therefore, in such a way the article propose addressing the limitation of renewable energy.

Q No 4

Correct any five of the following sentences.

1.

All kinds of stationeries is sold here.
All kinds of stationaries are sold here.

2.

If I know the answers, I would pass.

3

the examination.

If I knew the answers, I would pass the examination.

3. There has always been a fight between devil and divine.

There have always been a fight between devil and divine.

4. They cheated me. I wish I know them.
They cheated on me. I wish I know them.

5. A little elegance is left in those arrogant youth.

A little elegance has left in those arrogant of youth.

Q NO 5

Part (A)

Punctuate the following passage.

a boy was gathering you in the yeast.

A boy was gathering berries from a Hedge. When his hand was stung by a nettle, smarting with pain, he ran to tell his mother and said to her between his sobs, "I only touched it ever so lightly." Mother, "that is why, you got stung my son!" she said,

DATE: 1/1/

If you have grasped it firmly, it will
would not have hurt you in the least.

Part (B)

Rewrite sentence after filling in the
blanks with appropriate prepositions.

1. The poor live on their honest wages.
2. The thief did not swear to God.
3. You have no right to jeer at the beggars.
4. He is leaning towards/over the wall as he is not feeling well.
5. He has got each every candidate tries to pull over each voter.

Q No 7

Translate the following into English, keep
in view the idiomatic/figurative
expression.

..... مسالقی امتحانات کی تیاری کرنے والے کو طلبہ
..... مشق سے آتی ہے

Translation:

Students who are preparing for the
competitive exams ^{thought} that they
become toppers only if they stare
at the books and keep their
notes under the pillow at night.
These are those peoples who prepare

DATE: ___/___/___

only for two days after that they started searching reference in their prayers! The fact is that there is no "magic stick" and any "short cut" for the success. If one wanted unexpected results it require unexpected hardwork. So, when next time you are having a cup of tea in your hands and thinking either you have to "study or not". Remember! Success is not a joke it comes from hardships/hardworks.
