F- Conclusion

- Should not be detested, but rather be left to an individual's own free will.

Marriage! a very personal and intimate choice. A choice purely based on one's needs and desires, however is the topic of the town. Such a captivating topic that multiple TV shows are dedicated to it, such as "Bridgerton". Early marriage or late marriage must not be a topic of discussion. It must not resonate with age of an individual. It should be a choice made by people for themselves. Neither a child should be married nor a girl must be deprived of her right to marry based on her age. However, a growing trend is observed regarding late marriage. Educated individuals

are postponing their marriage to establish themselves economically before marriage. Moreover, social media and dating sites aids in raising the standards of individuals and fulfilling the physical, social and biological needs before marriage. However, whatever may be the cause late marriages benefits and harm the society simultaneously. Marriage is not a decision to be made impulsively nor under societal pressure. It empowers people to take decisions without under the impact of their hormones. It promotes education and aids in economy. Late marriages reduce the rate of social harms such as broken families domestic violence and marital rapes. Moreover, it encourages family planning. However, on the contrary it increases the risk of infertility and endangers the life of both mother and baby. It further accelerates the ~~chances~~ ^{impacts} of mental health and the chances of not marrying at all. Thus, the prospects are high and the consequences are not very bleak. Through mitigating measures such as minimising the role of society, age ^{and} religion ~~most~~ the negative implications can be mitigated. Hence, late marriage concept is escalating because of multiple reasons and has multifaceted impacts. It not only transforms an individual's life, but also frames the whole society. Therefore can not be ignored.
