

The Role of Information Networks in Shaping Societies

Thesis statement: Information networks have significantly shaped the societies on social, and technological front. whereas its challenges primarily techno-social in nature, so, preventive measures need to be taken in order to mitigate these challenges.

Outline:

I. Introduction

II An overview of information network in Shaping societies

III. The role of information networks in shaping societies:

A. Societies are interconnected via internet

B. Social mobilization in societies due to awareness campaign

C. Timely action save societies from catastrophic destruction

D. International ^{developments} ~~relations~~ nourish

clear stance of societies

E. Satellite images helps in curbing deforestation

F. Cultural hybridization due to information network

G. Information helps to build agricultural resilient coops

H. Utility of robots as helpers in western society

IV. Challenges faced by societies due to information networks:

A. Leak of confidential data via cyber threat

B. Fifth generation warfare manifest societies vulnerable

C. Artificial intelligence dwindling employment opportunities

D. Yellow journalism builds cognitive biasedness in societies

V. Preventive measures to utilize

information network for betterment

of Societies:

A. Create awareness regarding expanding information network

B. Innovative policies regarding checks and balance on information networks

C. Curb yellow journalism with an iron hand

VI. Conclusion

Essay:

In the annals of history, pigeons were utilized by the kingdoms as a source of networking. Where trained pigeons were given information via mini-letters, where their job was to deliver the message to the end user. However, with the passage of time, the mode of networking evolved. Where horses replaced pigeons
