# The Essay.

Empowering women is not just a matter of equality. It is the key of unlocking a nation's growth & progress in politics and in economy. Women are the backbone of the societies. They play vital role in shaping the societies and driving progress. A man cannot do anything without the support of women in every field of life even in driving country's politics and economy. Their participation in politics and economy is crucial for sustainable development. No nation can achieve true progress without the active participation of women.

Throughout the history, women have proven their ability to lead, innovate and to bring change. Despite

the Challenges, Women Contributions continues to strengthen the nations economy and politics which includes Women participation in politics, their leadership, policy making, work for poverty reduction, education & skill development, role in economic growth, business and innovation. also participation for workforce.
