Introduction Paragraph:

Women - that makes half of the total population - have been associated to the progress of the world, in varying ways and at different platforms throughout the course of history. One can name a profession, and he would ~~for~~ find a woman playing a key role in that profession. Likewise, the development of the world has gone through different phases, be it ^{pre-} industrial world or the modern age of information and technology, the women ~~have~~ ^{remained} been a key component of world's political and economic progress. However, women all around the world also faces various challenges, which ~~hinders~~ ~~her~~ ~~role~~ curtails her within the domestic unpaid labor, particularly in radical societies.
