- * Present the information without adding your own opinions or interpretations.
- * Ensure your precis is well-written and error-free.
- * Don't write in 1st and 2nd person Pronouns in Precis

Political Leaders are Best Actors Talented Performers

08/20

One has to wonder at the politicians' unique talent of using words for their own benefit. Whether asked a simple query or questioned their motives, they reply with such a bombastic language just to hide and evade their ignorance and showcasing their so-called intellect. They are also expert at making promises. They can make hundreds of them ~~only~~ till the votes are collected. Moreover, they do not even fail to entertain their viewers. Once the camera's lens is on them, they show exemplary performance of being innocent and virtuous. They hardly stick to an ideology, that is directly proportional to the political climate around them. This political class is, hence, a reminder that leadership is about perfecting one's performance. Question # 03 (Reading Comprehension)

08/20

1. Answer:

Renewable energy production is not immune to pollution if compared to the conventional fossil fuels. Renewable energy leaves its own environmental footprint and is absolutely not unblemished. Firstly, production of, let's say, solar panels, wind turbines etc., all require materials from earth i.e., extraction cause installing solar parks, wind turbines require large areas that can only result from deforestation. Lastly, recycling these equipments also require a mechanism otherwise it will lead to toxic waste.

2. Answer:

Electric vehicles (EV) have an image of being environmentally friendly. However, it has their own disadvantages for the climate. Firstly, their production is contributing to pollution, habitat destruction, soil contamination, and high water usage. Also, the electricity to charge the car if comes from fossil fuels then the whole idea of...

being environmental friendly dies. Lastly, recycling EVs can also cause toxic waste.

3. Answer:

Every renewable energy system has a life span of twenty to thirty years. Once they reach their full utility, recycling them is not simple and is also not practiced yet. Recycling these material require robust mechanism

4. Answer:

Renewable energy systems are not entirely pollution free during the operational phase. They have an intermittent nature i.e., they require some backup from the fossil fuel energy or battery storage. Both of which have notorious impacts on the environment.

5. Answer

The article suggests that the renewable energy is not the solution for the pollution problem. It is complex in its nature and requires careful management. Article suggests to acknowledge the limitations of the renewable energy.
