bestowed with a variety
of skills, which they use to achieve
their political goals. Firstly, they are

knack in the art of speech. They
are excellent at using sophisticated

phrases to hide their flaws and
decorate their bad governance. Secondly,

politicians have mastered the art of

fake promises. They make a lot of
promises before elections, but they reneged
from those promises after elections. Thirdly,

they are good at acting. They play
emotional cards to garner votes from
their audience. Thirdly, they have
special aptness for self-preservation.

During shifting sands in political
arena, politicians discard their ideologies
and prioritize their political interests.

Ultimately, leadership in politics is more about perfecting the art of performance than genuinely serving the people.

In a nutshell, political leadership

for renewable energy apparatus is inimical to environment. Moreover, manufacture of spare parts for renewable energy also have environmental cost. Furthermore, disposal of waste and operation of renewable energy apparatus generates hazards for the environment.

Q.2.

Manufacture of electric vehicles (EVs) require lithium. Mining of lithium is inimical to environment. Moreover, charging EV requires fossil fuels, which again degrade environment. Additionally, disposal of lithium batteries generate toxic waste. Thus, EVs are not total ^{partially} environment friendly.

Q.3.

After 20-30 years of their life cycle, waste of renewable energy systems is critical challenge. It is because of the reason that recycle of this waste is not practised. Thus, accumulation of this waste is dangerous for the

environment.

Q.4.

According to the article, operational phase of renewable energy is not entirely pollution-free. For their operation, renewable energy systems require backup reserve of fossil fuels. Moreover, they may need lithium and cobalt batteries as alternative of fossil fuels. Both of these practices cause environmental degradation.

Q.5.

The article draws attention towards the enormous environmental hazards arising from renewable energy sources. Mining, manufacturing, operating and disposal of waste, associated with renewable energy system also have detrimental impact on environment. In this way, this article propose to address limitations of renewable energy.
