

Q.1)

Title = Analyzing The Concept of Sportsmanship ×

Sportsmanship is a timeless trait that refers to a variety of virtues, including courage and persistence. It encompasses one's ~~best~~ reaction in a sports situation, dealing with treatment between persons. There are four elements of sportsmanship: good form, the will to win, equity, and fairness. Each element is integral to achieving the true essence of sportsmanship. Balance is also needed between elements, as conflicts may arise. In contemporary sporting culture, sportsmanship does not occupy a position of prime importance. Top performers tend to dictate the standards of this concept, with a "sore loser" and "bad winner" being the common two archetypes. A sore loser is one who would not take accountability for a loss, while a bad winner would not accept his win with grace.

Q.2)

1) Sensationalism in media creates a priority of flashy content over accuracy, leading to misinformation. In the process of identifying what is true and what is false, the public may become confused about facts.)

2) Media's framing of issues tends to overlook the intricacies of certain topics, opting for a simplified presentation. As a result of this presentation, people struggle to understand the depth of complex topics. **2**

3) Constant exposure to information in the 24/7 news cycle results in an overload of information. This leads to cognitive fatigue and severe reduction of critical thinking capability. People are no longer able to analyze information effectively. **4**

4) Conflicting cultural messages from media impact the societal norms, expectations, values, and narratives. Societal expectations are derived from such messages and often result in a chaos of messaging. **2**
