Masters of Political Stage

Title: Political Leaders: Loyal or Actors

Politicians have unparalleled aptitude for convoluted verbosity and dexterous evasion. When confronted with the simplest of ^{questions} inquiries, due to their mastery of linguistic acrobatics, no one dares to question their motives. Their promises are like autumn leaves. They forget them after elections. They perform different tactics to grab audience: For politician, a well-timed photo-op with a baby or a stray dog wields greater power than either. They have unparalleled talent for self-preservation.

Don't use "I, we, our, us" in Precis
It is blunder

0/20

Our leadership seems less about serving the populace and more about perfecting the performance. Ultimately, leadership in politics is more about perfecting the art of performance than genuinely serving the people.

Question no: 03

Part : 01

Answer:

Renewable energy production is an imperfect solution. It is a resource-intensive process. Production of these resources results in significant pollution.

Though it reduce reliance on fossil fuels, it requires careful management and realistic expectations. By working on its limitations, we can hope for it as a perfect solution.

Part : 02

Answer:

Electric vehicles (EVs) are not a complete solution to reduce pollution. In its manufacturing process, lithium-ion batteries require materials like lithium, cobalt and nickel.

Mining for these cause habitat destruction, soil contamination and high water usage.

Moreover, improper recycling of battery disposal leads to toxic waste.

Part : 03

Answer:

Renewable energy systems like solar panels and wind turbines have finite lifespan of 20-30 years. After their life ends, their

disposal becomes critical. Recycling their components is not simple or easy. It is not widely practiced so do not have infrastructure for managing this disposal. This results in accumulation of toxic waste.

Part : 04

Answer:

Renewable energy is not entirely pollution-free during its operational phase because they require fossil fuel plants or rely on battery storage, which has their own environmental challenges. Lithium and cobalt used in batteries supply chain notorious for environmental degradation.

Part : 05

Answer:

The article proposed the limitations of renewable energy but it does not discredit the value of renewable energy as a critical component in mitigating climate change. It advocates for a balanced perspective that a careful management is required for renewable energy. By improving its limitations, we can get benefit from renewable energy.
