5: Conclusion

From the shadows of challenges to the dawn of possibilities, Pakistan's economy stands at critical cross-roads.

Pakistan is a country with rich resources, unlimited potential and untapped growth. Pakistan just needs a visionary leadership for sustainable growth. It has ample resources but their utilization in righteous manner is demanded. Pakistan's economic future is bright after having some reforms such as increasing tax to GDP ratio, boosting tourism, women workforce share, minimizing brain draining, controlling corruption and promoting IT exports. Pakistan's economy is dealing with multifaceted ~~problems~~ such as political instability, terrorism ~~and~~ concerns of security for foreign investments, Uneducated and unskilled population

is a burden on economy.

Overpopulation is a key factor that create multidimensional issues.

Pakistan has potential to overcome these issues and achieve a

sustainable ^{economic} growth. The future of Pakistan will be more bright

with opportunities than now. As

Pakistan is stepping towards sustainable economic growth.

Since Pakistan's creation, it has a fragile economy.

It's early years were agrarian,

and later on from 1960s were referred as "Golden decade" of economic

growth. Industrialization and Green Revolution boosted its economy. Pakistan

was economically strong and set examples for developing nation by

purchasing Gwadar port from Oman. In upcoming years, Pakistan's

economy strained by political influences and structural challenges.

They were faced by the Pakistan

in the form of energy crisis, debt rising and environmental degradation. Economic losses in the form of fiscal deficits exacerbating the inflation and poverty. According to the World Bank report 2023, Public debt exceeding 77% of GDP in 2023, Pakistan's economy continues to face challenges such as low tax revenues, high population growth and climate vulnerability.

In a nutshell, Pakistan's economic future is hopefully bright, it has potential to achieve sustainable growth. Pakistan, since its creation, is facing multifaceted problems. It has immunity to survive in the worst conditions of economy. Pakistan can step towards growth by increasing tax-to-GDP ratio, improvement are being noticed in the growth

from last year's 8.7% to 9.0% increase, according to Federal Board of Revenue. Formation of Special Investment Facilitation Council for attracting Foreign Direct Investments and reduction in subsidies are key drivers for growth mechanism. CPEC project should be considered again for prompt development, abolition of corruption and minimization of brain draining are necessary for economic growth. Pakistan's economic future will be more promising than present. To make it reality certain reforms are needed that are the key drivers for Pakistan's economic growth. With its resilient population, abundant natural resources and a significant demograph, Pakistan holds immense potential to overcome its challenges and pave the way for a prosperous and inclusive future, driven by innovation, unity and sustainable growth.
