3.

Not only men, but women are also the epitome of strength in a society. Women are human beings with unique decision-making power and handling the worse situations with sensible acts and decisions. The contributions of women, in a society, must be recognized and motivated, which would help them work hard and progress in the field. Just like house chores, women also play a crucial role in driving the political and economic progress in societies world wide.

The role of women in politics has been transformative, contributing in the creation of more sustainable societies. Along with politics, recently women are seen working with great passion in key leadership positions of economy as well. In this modern era, women not only manage the economic domain of the household but at higher social and international levels as well. However women also face many challenges at their work place which must be addressed for the progress of women and promotion of equality.

Participation of women in the society, specifically in political and economic sector, brings a diverse perspective, focus on gender equality and also promote the inclusive development.
