

Instructions

Part - II :

1. Give numbering to headings :-

Introduction :-

2. Do not write lengthy paragraphs. Write medium sized paragraphs with headings.

3. There should be around 12 headings for 16 marks question.

4. Draw figures/diagram/flowchart where needed.

5. Start new question from fresh page.

6. Each answer should start with Introduction and end with Conclusion.

Justice (Adl) :-

Justice is the cornerstone of Islamic governance and is emphasized in the Quran. "Indeed, Allah commands you to render justice to whom they are due and when you judge between people to judge with justice" (Quran 4:58).

7. Give more weightage to expressly asked part/s of the question.

8. Change colour scheme for references to give them more visibility.

Applicability in Pakistan :-

9. Manage time well.

(a). Judicial Reform: Strengthening judicial institutions to deliver timely justice can reduce corruption and political interference. For instance, an independent judiciary aligned with Islamic principles can ensure impartial decision-making.

10. Wide page borders are discouraged. Should be reasonable.

11. Avoid writing wrong references.

(b). Economic Justice: Ensuring equitable distribution of wealth through systems like Zakat can address income inequality. The establishment of a transparent Zakat system at both provincial and federal levels can help uplift

marginalized communities.

Example:

The Second Caliph, Umar ibn al-Khattab (RA), implemented justice by ensuring equal treatment of all citizens, regardless of status. This model can inspire reforms in Pakistan's judicial and economic systems.

2. Consultation ('Shura') :-

Shura promotes participatory governance, encouraging decision-making through collective consultation. The Quran states: "... and those who have responded to their master and established prayer and whose affair is [determined by] consultation among themselves..." (Quran 42:38).

Applicability in Pakistan:

- (a). Decentralization of Power: Strengthening local government systems can encourage public participation and ensure that governance reflects the needs of communities.
- (b). Policy-Making: Establishing consultative bodies comprising diverse stakeholders can enhance inclusivity and transparency in policy formulation.

Example:

The Prophet Muhammad (PBUH) consulted his companions during significant decisions such as the Battle of Uhud. Similarly, Pakistan's governance can benefit from broader stakeholder engagement to address complex issues like

Climate change and economic policy

3. Accountability ('Mas'uliyah') :-

Accountability in Islamic governance ensures that leaders are answerable to both Allah and the people. The Quran emphasizes this principle: "... and they are responsible for what they do" (Quran 16:93).

Applicability in Pakistan:

(a). Strengthening Accountability Institutions: Agencies like NAB (National Accountability Bureau) and FIA (Federal Investigation Agency) should be reformed to function without political influence.

(b). Transparent Governance: Mandatory public disclosure of assets by officials can reduce corruption and ensure accountability.

Example:

Caliph Umar ibn al-Khattab (RA) was known for his accountability, once responding to a complaint by justifying his personal wealth before the public. A similar standard can be institutionalized for Pakistani leaders to rebuild public trust.

Addressing Contemporary Challenges:-

1. Corruption:

Islamic principles discourage bribery ("And do not consume one another's wealth unjustly or send it [in bribery] to the

rules...." - Quran 2:188). A robust accountability mechanism can mitigate corruption in government and institutions.

2. Inequality:

Redistributive policies inspired by Zakat and Waqf can reduce wealth disparities.

3. Weak Institutional Capacity:

Training public officials in ethical governance rooted in Islamic values can strengthen institutions.

Conclusion:-

Integrating Islamic governance principles into Pakistan's modern framework offers a viable solution to contemporary challenges. Those above discussed values, combined with institutional reforms, have the potential to transform Pakistan into a more resilient and equitable state.

Q. 3 :-

Introduction:-

Citizen engagement is central to good governance, fostering accountability, transparency and effective service delivery. In Pakistan, action research - an iterative process of problem identification, stakeholder collaboration and adaptive implementation - can play a pivotal role in enhancing participatory governance.

What is Action Research?

Action research is a participatory approach where stakeholders, including citizens, governments and civil society, collaborate to identify problems, test solutions and implement reforms. It emphasizes continuous feedback, learning and adaptation to ensure practical outcomes.

Leveraging Action Research in Pakistan's Governance:-

1. Enhancing Participatory Governance:

Community Involvement: Action research can empower citizens to participate in decision-making, particularly in local governance.

Policy Co-Creation: Engaging citizens in designing policies ensures that governance reflects their needs and priorities.

Example:

Participatory budgeting in Brazil inspired initiatives in Pakistan, such as the Citizen Budget in Khyber Pakhtunkhwa (KP), which allowed communities to provide input on budget allocation. Scaling similar programs nationwide can enhance inclusivity.

2. Strengthening Service Delivery:

Collaborative Problem-Solving: Citizens and officials can jointly identify bottlenecks in public service delivery and co-develop solutions.

Localized Interventions:

Action research allows for tailored solutions based on local needs, improving the efficiency of service delivery systems.

Example:

In Karachi, the Orangi Pilot Project engaged local communities to develop low-cost sanitation systems. This community-driven initiative significantly improved service delivery and living conditions in informal settlements.

Framework for Effective Implementation:-

1. Problem Identification:
 - Conduct baseline surveys to identify governance and service delivery challenges.
 - Engage citizens to prioritize issues based on their needs.
2. Implementation and Adaptation:
 - Pilot initiatives at the local level to test feasibility & impact.
 - Use iterative cycles of implementation, feedback and refinement for scalability.
3. Monitoring and Evaluation:
 - Establish mechanisms for citizens to evaluate the outcomes of governance reforms.
 - Regularly publish progress reports to ensure transparency and build trust.

Challenges and Solutions:-

Challenges:

1. Resistance to Change: Government officials may resist participatory approaches.
2. Lack of Awareness: Citizens may lack knowledge of their rights and roles.

3. Resource Constraints: Limited financial and human resources can hinder implementation.

Solutions:

1. Policy Support: Institutionalize participatory governance through legal frameworks.
2. Awareness Campaigns: Educate citizens about their roles in governance.
3. Public-Private Partnerships: Mobilize resources by engaging the private sector and civil society.

Conclusion:-

Action research offers a transformative approach to governance by integrating citizen engagement into decision-making processes. Scaling and institutionalizing these practices can pave the way for participatory governance and sustainable development in Pakistan.

Q.5:-

Introduction:-

Governance indicators - such as rule of law, government effectiveness and regulatory quality - are crucial for economic stability and growth. In Pakistan, bureaucracy plays a ^{central} ~~crucial~~ role in policymaking and implementation, significantly impacting these indicators. However, Pakistan's bureaucracy is often criticized for inefficiency, corruption and lack of capacity. Reforming the bureaucratic structure can strengthen governance, improve economic performance and ensure sustainable reforms.

Role of Bureaucracy in Improving Governance Indicators :-

1. Rule of Law:

Bureaucracy is responsible for ensuring the fair implementation of laws and maintaining institutional integrity.

Current Challenges: Political interference undermines impartiality. Corruption in law enforcement weakens public trust.

2. Government Effectiveness:

An efficient bureaucracy ensures the timely delivery of public services and implementation of policies.

Current Challenges: Outdated procedures and red tape hinder efficiency. Lack of training and resources affects service delivery.

3. Regulatory Quality:

Bureaucracy formulates and enforces regulations that influence economic activities.

Current Challenges: Complex regulatory frameworks discourage investment. Overregulation and lack of coordination between departments create inefficiencies.

Effective Bureaucratic Reforms for Sustainable Economic Growth :-

1. Capacity Building:

Regular training programs to equip bureaucrats with modern skills in governance, economics and technology.

Example: Civil Service Academy reform to include specialized modules on regulatory quality and economic policy.

2. Depoliticization of Bureaucracy:

Enforce merit-based recruitment and promotions to reduce political interference. Strengthens institutions like the Federal Public Service Commission (FPSC).

3. Strengthening Accountability Mechanisms:

Empower oversight bodies like the Auditor General of Pakistan to monitor bureaucratic performance. Introduce whistleblower protection laws to curb corruption.

Recommendations to Align Bureaucracy with Governance and Economic Goals:

1. Integrated Policy Framework:

Align bureaucratic reforms with national development plans such as Vision 2025 or Sustainable Development Goals (SDGs).

2. Public-Private Partnerships (PPPs):

Involve private sector expertise in reforming bureaucratic processes, especially in regulatory frameworks.

3. International Best Practices:

Learn from countries like Malaysia and South Korea, which transformed their bureaucracies to drive economic growth.

Negative role?

Conclusion :-

Bureaucracy plays a ~~crucial~~ pivotal role in strengthening governance indicators, which are essential for sustainable economic reforms. However, Pakistan's bureaucratic inefficiencies hinder progress in rule of law, government effectiveness and regulatory quality.

Q.6 :-

Introduction :-

Institutional building and effective governance are critical drivers of sustainable development, economic growth and business opportunities. In Pakistan, weak institutions, governance inefficiencies and corruption have hindered economic progress and global competitiveness. Strengthening institutions can enhance accountability, transparency and efficiency, creating an environment conducive to investment and long-term development.

Role of Institutional Building and Governance in Sustainable Development :-

1. Economic Growth and Stability :

Strong institutions promote macroeconomic stability by enforcing laws, maintaining fiscal discipline and ensuring transparency.

For example, an independent central bank can stabilize monetary policy, which is crucial for investor confidence.

2. Attracting Investments :

Transparent governance and efficient institutions reduce the risks associated with investments.

Countries with strong rule of law and regulatory quality attract Foreign Direct Investment (FDI) by providing a predictable business environment.

3. Sustainable Development:

Institutions play a key role in implementing policies aligned with the Sustainable Development Goals (SDGs), such as poverty alleviation, education and environmental sustainability.

Example: Effective governance can ensure equitable distribution of resources through programs like the Benazir Income Support Program (BISP).

Contribution of Institutional Strengthening to Global Competitiveness:-

1. Improved Ease of Doing Business:

~~Streamline~~ Streamlining bureaucratic processes and reducing red tape attract global investors.

Example: The World Bank's Ease of Doing Business Index ranks countries based on regulatory efficiency, where reforms in Pakistan have already shown positive impact.

2. Improved Workforce Development:

Institutions governing education and skill development contribute to a competitive labor market.

Collaboration with the private sector can align educational outcomes with market needs.

Challenges to Institutional Building and Governance in Pakistan:-

1. Corruption and Nepotism:
Widespread corruption erodes trust in institutions and deters investment.
2. Political Instability:
Frequent policy changes and lack of political continuity undermine long-term reforms.
3. Resource Constraints:
Limited financial and human resources hinder institutional capacity building.

Recommendations for Reform:-

1. Strengthening Rule of Law:
Ensure judicial independence and speedy resolution of commercial disputes.
2. Institutional Coordination:
Clearly define roles and responsibilities of federal and provincial governments to avoid overlaps.
3. Fostering Political Stability:
Build consensus among political parties on long-term development goals to ensure policy continuity.

Conclusion:-

Institutional building and effective governance are essential for Pakistan's sustainable development and global competitiveness.

Strengthening rule of law, improving regulatory frameworks and fostering political stability can attract investments and unlock business opportunities.
