

Malnutrition in Pakistan: Causes and Consequences

Incomplete 1- Introduction:-

Thesis Statement:

Malnutrition is one of the biggest challenges that Pakistan is facing because of unawareness among individuals regarding balanced diet and structural injustices, leading to stunted growth and waste of human capital.

Prioritizing health of mothers, equitable resource distribution and equal economic opportunities can address the issue.

2- What is malnutrition?

3- Causes of Malnutrition :

3.1 Lack of awareness regarding balanced diet and unhealthy eating habits.

3.2 Women health is an forgotten challenge which leads to the birth of weak babies.
