

Follow the Given Instructions to get Good Marks in Precs

- * Understand the original text thoroughly before attempting to write a precis.
- * Determine the central theme or message of the text.
- * Avoid copying sentences directly from the original text. Express the ideas in your own words.
- * A precis should be much shorter than the original text (in Single Passage). Aim for about one-third the length.
- * Use clear and simple language, avoiding jargon or complex sentence structures.
- * Use short, straightforward sentences to convey information effectively.
- * Prefer active voice over passive voice to make your writing more choice and engaging.
- * Choose words that accurately and succinctly express the ideas.
- * Avoid unnecessary words or phrases that do not add to the meaning.
- * Present the information without adding your own opinions or interpretations.
- * Ensure your precis is well-written and error-free.
- * Don't write in 1st and 2nd person.

Political Leadership: Performance over Service

0/20

Seeing politicians hoisting flags of honesty and pride makes it difficult to not be amused at their unique capability of diverging the truth. Having their way with words, a politician's answer to a relatively simple query is buried beneath a ~~load~~ load of jargon, leaving the querier lost in a maze of empty words and vows; vows that lose meaning post election.

Write in single passage

Follow the basic rules of precis

Emotions, sometimes used to appeal to the public conscience and sometimes as a defense mechanism, are a politician's best friend.

Politicians practice skills like flickery and blame-shifting as survival instincts — maintaining a public profile rather than taking initiative.

In comprehension answer each question comprehensively

Ans 03:- While the environmental impact of renewable energy production is significantly ~~more~~ less than what is widely perceived, it is still not as intense or far-reaching as that of traditional fossil fuels.

07/20

2. EVs are environmental friendly in terms of the environmental footprint they emit while being used. However, if the environmental footprint of their production and waste disposal is taken into account, the relatively lesser emissions of their usage hold little significance. Curbing the negative impacts of battery production and disposal would make EVs environmental friendly in true sense.

3. The infrastructure required to recycle or efficiently dispose off renewable energy systems (e.g. wind turbines and solar panels) is not readily available. Without the infrastructure waste disposal becomes difficult to manage.

4. As renewable energy systems cannot function at a 100% capacity at all times (due to factors like the absence of the sun and wind), they need a backup like fossil fuels or battery storages. Both of which have negative environmental impacts.

5. The limitations can be addressed by careful management of production and waste-disposal associated negative impacts and by managing expectations from the renewable energy systems — It is not a fix-it-all solution to the environmental issue and it should not be treated as one. For it to be used efficiently, it needs to be used responsibly.

Some of the students preparing for the upcoming exams are of the view that staring at book covers or sleeping with notes under their pillows will help them top the exams. These are the same people who offer prayers in hopes of intercession after studying for merely two days! The truth, however, is that no one possesses a "magical wand" nor is there a "short cut" ^{to success}. Extraordinary results demand extraordinary efforts. Therefore, the next time you think to yourself "should I study or not" while holding a cup of tea, remember that success is achieved ^{shortcuts} not through humour but hardwork!
