Date: _____

Day: _____

Q:7 Define Budgeting and its various types. Best ways to use budget as policy and managerial tool of administration.

Budgeting and various types

Definition of Budgeting:

Budgeting is a process of creating a plan to allocate resources, typically financial, over a specific period of time to achieve organizational or policy objectives.

Types of Budgeting

1. Line Item Budgeting

Focuses on allocation of funds to specific categories or items (e.g. salaries, equipment).

2. Performance based Budgeting

Links funding to specific outcomes or performance metrics. Encourages efficiency and effectiveness in achieving goals.

3. Zero-Based Budgeting

Requires justifications for all expenses from scratch, regardless of previous budget. Promote cost-effectiveness but is time-intensive.

Date: _____

Day: _____

④ Program based Budgeting

Groups expenditure by programs or projects rather than departments. Aligns resource with strategic priorities.

⑤ Incremental Budgeting

Adjusts the previous year's budget by a percentage increase or decrease. Simplifies the process but may perpetuate inefficiencies.

⑥ Capital budgeting

Focuses on long term investments like infrastructure or major projects. Ensures sustainable development.

Date: _____

Day: _____

Using Budgeting as Managerial tool

1. Setting Priorities ✓

Budget reflects government policies by allocating resources to critical sectors like health, education and infrastructure.

2. Economic stability

Fiscal policies embedded in budgets, such as taxation and government spending are tools to stabilize the economy.

3. social equity

Budgets promote social equality by funding targeted welfare programs for marginalized groups. Ex: subsidies for low income families, women empowerment schemes and scholarships.

Managerial Tools

1. Planning

Budgets set clear objectives and allocate resources to achieve them efficiently.

2. Control

Ensures financial discipline by monitoring expenditures against budgeted amount to avoid spending.

3. Accountability

Budget enhances transparency by requiring departments to justify their expenditure.

4. Performance Evaluation

links resource allocation to measurable outcomes, enabling an assessment of efficiency and effectiveness.

Date: _____

Conclusion:

Day: _____

8

20

The budget serve as both strategic policy instrument and a practical managerial tool, by effectively allocating resources, ensuring accountability and evaluating outcomes.

Q8: What is administrative reform? if it is merely limited to reform in the structure of civil services or the scope of public administration reform can be broadened to privatization. Regulations deregulation and de-centralization in an organization discuss?

Administrative Reform

Administrative reforms deliberately refers to efforts to enhance the efficiency, responsiveness of government

Date:

Day:

is limited administrative service
to civil servants

While reforming the
civil servants is a
vital component of
administrative reform the
scope of reform extends
far beyond reconstructing
administrative frameworks

Broader scope of
administration

1. Privatisation

The transfer of
ownership and management
of state owned
enterprise (SOEs) to
private entities to
enhance efficiency

2. Regulation:

Establishing regulatory
frameworks to promote

Date: _____

Day: _____

accountability and transparency
in both fair competition
private public and sectors ✓

3. De-regulation

Reducing excessive government control over industries and market for fostering competition and innovation. This encourages private sector participation and improves economic performance.

4. Decentralization

Transferring authority and decision-making from central to local governments. This improves service delivery and promotes participatory government to ensure decisions are made closer to people affected by them ✓

Date:

Day:

Broader scope of administrative reform

1. Institutional Strengthening

Strengthening Institutions by empowering them with powers such as judiciary, police and anti-corruption bodies.

2. Digital Transformation

Leveraging information and communication for the transforming and reforming.

3. Capacity building ✓

Providing them training and resources to equip civil servants to tackle necessary modern administrative challenges.

Date: _____

Day: _____

4. Public private partnership

Collaborating with public private partnerships to enhance infrastructure and service delivery while sharing risks and benefits

Conclusion:

Administrative reforms is a multi dimensional concept that transcends the restructuring of civil servants. It includes broader initiatives such as regulation, decentralization, deregulation and digital transformation.

6/26

there is a clear issue of time management over all paper is bland and very generic theoretical perspective is missing too
