CSS Mock Exam

Topic

If you can dream
it, you can achieve
it.

Brainstorming :-

Outline

22.2

1. Introduction

1.1. Hook

1.2. General Introduction

1.3. Thesis Statement

Topic

if you can achieve
it, you can achieve
it.

2. Dreamers who turned their dreams into reality

Brainstorming

2.1. Politics

2.1.1. Quaid-e-Azam

2.1.2. Benazir Bhutto

2.1.3. Nelson Mandela

2.2. Sports and Games

2.2.1. Arshad Nadeem

2.2.2. Imran Khan

2.2.3. Usain Bolt

2.3. Business and Entrepreneurship

2.3.1. Bill Gates

2.3.2. Elon Musk

2.3.3. Monis Rahman

2.4. Humanitarian Work

2.4.1. Abdul Satar Edhi

2.4.2. ~~Dr. Ruth Pfau~~ Dr. Ruth Pfau

2.4.3. Princess Diana

2.5. Arts and Literature

2.5.1. Allama Iqbal

2.5.2. Bano Qudsia

2.5.3. Faiz Ahmed Faiz

2.6. Education

2.6.1. Malala Yousafzai

2.6.2. Dr. Mariam Chughtai

2.6.3. Booker T. Washington

2.7. Medicine and Health

2.7.1. Dr. Jonas Salk

2.7.2. Prof. Atta-ur-Rahman

2.7.3. Dr. ~~Abd~~ Adeeb-ul-Hassan Rizvi

2.8. Science and Technology

2.8.1. Dr. Abdus Salam

2.8.2. Dr. Abdul Qadeer Khan

2.8.3. Arfa Karim

3. Conclusion

Picture a vast ocean of possibilities ahead of you, your dreams are the ship ready to sail toward success. Throughout history, all the major advancements in

different fields of life had been brought by dreamers, who first dreamed of doing some breakthrough, and subsequently put all their efforts in translating those dreams to actions. There are thousands of examples where dreamers were able to see the completion of buildings being founded by them. At the same time, many of dreamers could not live enough to eat fruits of trees planted by them. Regardless of this fact, it is inevitable that all dreams can come true if one has the courage to pursue them. From early prophets to this day mankind, humans have always dreamed for success in different domains of life. Dreaming is the first crucial step toward success, but turning these dreams into reality requires courage, determination, hard work, and the resilience that can be seen among different noble

nobel laureates.

Since the evolution of mankind, man has always dreamed to become civilized. For this purpose, political science has gone through immense developments. One of which is the dream of a separate homeland where people with similar characteristics can ~~share~~ live together. This was the same dream for which Quaid-e-Azam Muhammad Ali Jinnah worked tirelessly to liberate Muslims of the Sub-continent from British and Hindus. He was the founder of Pakistan who turned the dream of separate homeland into reality despite multiple setbacks. He went through multiple obstacles, and ^{sometimes} even rejections from its own people, but he remained firm to achieve his goals. Similarly, Benazir Bhutto, the first female Prime Minister of a Muslim country, went through many challenges but she continued to be a symbol of women empowerment and restoration of democracy. She faced

DATE: ___/___/___

exiles but still she never gave up on her dream of reconciliation. It was her resilience that led to the famous "Charter of Democracy" in 2006 during the regime of undemocratic forces. Another symbol of a successful dreamer is Nelson Mandela who served 27 years in prison but never gave up on his dream of becoming South African President.

Sports and Games is another field where dreamers proved that if you can dream, it you can achieve it. For instance, Imran Khan, a legendary Pakistan Cricketer, saw a dream of winning World Cup for Pakistan, and he was able to fulfil his dream in 1992. It was the first and the only ICC Cricket World Cup that Pakistan won. Despite a rocky start, Pakistan was able to beat England in the final under the charismatic leadership of Imran

Khan. Another dreamer of Pakistani land is Aashad Nadeem who imagined himself raising Pakistani flag high in international athletics. Even though, he had scarce resources and poor support, but he managed to win Gold Medal for Pakistan in Javelin throwing. Usain Bolt, the man with the record of being the fastest in the world, also fulfilled his dream of the fastest man. He won multiple records Olympic gold medals and set world records.

While dreamers take took over the domains of politics and sports, how businessmen and entrepreneurs could let themselves out of the competition. It was with this in mind that Bill Gates dreamed of a world where computers would be on every desk. This was the rationale behind his visionary approach of founding Microsoft giant and reshape global sphere. Elon Musk, another

dreamer, who thought of colonizing Mars so he gifted the world Tesla and SpaceX. Similarly, Monis Rahman envisioned to connect job seekers and employers in Pakistan to overcome narrow down the gap between them, so he took initiative of Rozee.pk. and he uplifted ~~now, multiple~~ Because of this platform, hundreds of people have taken advantage to fulfil their goals.

Humanitarian work has always been on the dream list of many people to satisfy their spiritual desires and serve humanity. The most prominent figure from Pakistan in this regard is Abdul Sattar Edhi. He dreamed of serving humanity without any bias. He built Pakistan's largest charity network of Edhi Foundation from just one ambulance. ~~Dr. Ruth Pfau~~ ~~Dr. Ruth Pfau~~ is another beautiful soul who served the homeland of Pakistan to fulfill her

dream of serving the poor by curing leprosy. She is often called "Pakistan's Mother Teresa" for her selfless services for this nation. Princess Diana also dreamed of serving this world with compassion so she led campaigns on AIDS and landmines to redefine what it means to be a royal, serving your people first.

~~The~~ Art and literature, which is considered the most important domain to shape a country's moral situation, is also not short of those who envision to make this world a beautiful place. For instance, Allama Iqbal, "The poet of the East," worked for the Muslim's identity through his poetry. He dreamed spiritual awakening among his Muslim brothers and achieved it in the form of charismatic leadership of Quaid-e-Azam who founded Pakistan. In the same way, Faiz Ahmed

Faiz believed that words ~~can~~ could fight injustices. He achieved his dream by fueling social movements and awakening Muslims. Both Allama Iqbal and Faiz Ahmed Faiz had great contributions in the development of political awareness among Muslims of the Sub-continent. Other than these, Bano Aapa dreamed of ~~discover~~ articulating the social fabric of Pakistan to instil empathy and enhance social connections. She wrote multiple stories and plays to turn her dream into reality.

Education is considered as the most important indicator of a country's progress, so for a developing country like Pakistan, dreamers had always come forward to contribute their efforts. In this regard, the "Noble Peace Prize" winner, Malala Yousafzai is the icon for girls' rights to education even in the face of bullets. Similarly Dr. Mariam Chughtai, the Director of

National Curriculum Council of Pakistan, achieved her dream of an inclusive, research-driven education system via policy reforms. From across the globe, Booker T. Washington, who was a born slave dreamed of uplifting his race through education and hard work. He was an African-American educator of 19th and early 20th century who worked for African civil rights. His famous 1895 American Atlanta Compromise Speech urged Africans to accept segregation and prove their worth.

Medicine and Health has also served as a breeding ground for many dreamers. One of them is Dr. Adeeb Rizvi who envisioned of a healthcare system for poor people so he made Sindh Institute of Urology and Transplantation. It is a non-profit organization that provides free treatments. Professor Atta-ur-Rehman also dreamed of a scientifically advanced

nation so he build modern research institutions. NUST University in Pakistan has a department on his name as an acknowledgement for his efforts. Here, how can John Salk be forgotten who made Polio Vaccine to eliminate this ~~dead~~ disease. He dreamed of a polio-free world so he ~~also~~ freely gave it to everyone. When asked who owned the patent, he famously replied that "there is no patent. Could you patent the Sun?"

Finally, while exploring the greatest dreamers of Science and Technology, Dr. Abdul ~~Qadeer~~ Qadeer Khan takes the pride for Pakistani Nation. He was the father of the Pakistan's nuclear program. He envisioned a Pakistan with nuclear deterrence, so he managed it when the whole world in 1998 saw Pakistan emerging as the first and only Islamic country to possess nuclear assets.

Another dreamer, but a very young little angel, is Aarfa Kazi, who fulfilled her dream of the World's youngest Microsoft Certified Professional at the age of nine. Last but not least, how can we forget Abdul Salam, the first Muslim Scientist to receive a Nobel Prize in Science in 1979 for his famous work of electroweak unification theory.

In the conclusion, dreaming is an essential step toward success. All the nobel laureates mentioned in the essay ^{proved} ~~emphasize~~ ~~on~~ the ~~fact~~ notion of dreams behind reality. One cannot become successful until he has a dream behind it. Dreams act as a driving force to determination, hard work, and resilience to achieve goals. It is also concluded that if you have dreams, you hold the power to turn them into reality by believing in yourself and committing to your goals.
