- Palestine
- Aerial Airdrop.
- Airdrop Aid causes death
- Stoppage causes parching

g- China Aid

- Aid to Russia
- Become Superpower
- Aid to Pakistan
- Aid to Sri Lanka,

Conclusion

The Essay

Foreign Aid was the new way of colonialism as said in the book the economy hitman. Aid provided by developed countries to underdeveloped and developing countries is more like a cage rather to feel free or freedom of one country. Aid providers now using aid as a tool to colonized the states and countries. Aid providers used according to their will and rule in developing countries by helping in the shape of money, reliefs, technological equipments, defense system and many more. Aid becomes a burden ^{as a} foreign debt for many countries which are unable to pay debts and then their foreign reserves become weak and countries faces problem in shape of

inflation, poverty, unemployment and many other issues. Major Aid provider is United States of America, World Bank International Monetary Fund (IMF). These provide aids to poor countries, struggling countries and developing countries like: Ukraine, Pakistan, Kingdom of Saudi Arabia, Palestine and many other small countries. China also providing help to Russia and Pakistan and also other neighbour countries - Israel somehow provides aerial aid to Palestine especially during their conflict with Hamas.

First of all, United States of America, which is known as the superpower, providing aid to Ukraine. This aid starts majorly at Russia-Ukraine conflict on 22nd of February, 2022. Because USA

helps Ukraine and that is why to strengthen their military powers, US start aiding Ukraine in the form of dollar money. But it can be seen very clearly after oval house meeting when Ukraine President Volodymyr Zelensky and US President Donald Trump meet up in 2025 for a Mineral-Deal Agreement. Things become get wrong and meeting ended in a blame game and aggressive manner. So, Mr. Trump stop the aid for Ukraine and said that they couldn't go for any sort of aid in Ukraine. The purpose of Mr. Trump is to achieve all the minerals from Ukrainian land but they are failed badly. But a setback is for sure comes for Ukraine because they need more and more aid for combating

against Russia. In other sense,
US Aid stick to country's
habits and now Ukraine wan
ts to get rid of it but they
cannot.

Then US provided Aid to
Palestine for the purpose of
capturing their land and
making an Israeli commun-
ity there. These aids is
just a so called aid in
other sense these are death
or slow-poison for Palestine.

Trump sometimes stops the
aid from Palestine. ^(America) Because
want to make realized them
that without America
no country can be
happy, prosperous and
successful.

US provides Aids to Pakistan
also by different Fund
organizations like UNESCO,
UNICEF, etc. Pakistan make
aid in sense of money
and then Pakistan face

foreign debt. Burden on
Foreign debt causes no
foreign direct investment and
debt servicing, which effec-
ted Pakistan's economy
very badly. The root cause
of foreign debt is that
a Pakistani country can not
generate taxes and lower
taxation and ~~the~~ lower
taxes, remittances could
be the major reason for
debt servicing. In other
sense, US making Pakistan
a puppet, use according to
their mean and do whate-
ver US want to do just
by providing Aid. US can
not want to any other
country emerging so that
is why they provided
huge aid in the form of
loans so no country can
easily pay that rather in
the form of installments
or anything else.
