3. Conclusion

Work on your outline making

Must work on your topic comprehension

Words selection should be improved

Can't be called as an attention grabber

Must attend the tutorial session for further suggestions and mistakes

You are not supposed to provide any information in your introduction

"Congratulations, Ellen, you have made it." Her day started with a whisper that her inner self was repeating but she wondered why. Then her whole family came in her room and they celebrated her success as she became the first girl in her village who became a Csp. Her father said, "You achieved it the day, you had dreamed it". She also believed in her dreams when everyone around was trying to demotivate her. She kept going and remained focus because she knew and felt the words of **Zohran Mamdani**, a US politician and a candidate for Mayor of New York City.

when he said, "In the world of Nelson Mandela, it is always impossible until it is done."

She saw a dream, worked on it and lived the reality of that dream. This is not a fiction, this is story of every dreamer who believes in dreams.

The foundation of every success is a dream, and when dreams are pursued with an inspiration, belief in one's inner self, with clear goals and plans, and continuous hardwork then dreams become the reality. Dreams are foundation of all achievements, with clear vision, strong beliefs, and persistent efforts, one can turn any dream into reality. This is the interpretation of that famous quote that if you can dream it, you can achieve it.

Dreams are very powerful and have an inspirational role in achieving something.

Dreams set the first stone of building of success. By various psychological studies it is proved that dreams have a huge role in achievements of many successful people. Because of his dream **Abdul Sattar Edhi** made it possible to give humanitarian services on such a large scale and lived the reality of his dream in his life and even after his death his work never stopped. This all became possible because his dreams was powerful enough to make him work hard to turn it into reality.

Belief in one's inner self is another significant factor to convert the dreams into reality. People who see big dreams are those who believe in themselves and have faith in their own unique talents. Nobody come

to tell a person that he is capable to do any thing and it is one's own self who give self confidence and courage to pursue the path of achieving his dreams. Pakistani actress **Mahira Khan** used to work in a US store when she saw a dream of working with her ideal filmstar Shahrukh Khan and there was none who believed in her. But she believed in herself and made the ways to make it possible and finally she achieved it as she worked in movie "**Raees**" with co-star Shahrukh Khan. It means belief in one's own self is more important than anything to achieve ^{a dream} success.

Setting clear goals is the next thing required to convert a dream into reality.

After having a dream one sets clear goals to achieve

You are providing me the factors which are not the asked part at all

that dream. The realistic and practical approach is needed to set specific goals aligned with dreams.

As **Zohran Mamdani** ^{have} set

clear goals of making the new york city affordable and to ensure the due process of law as a mayor, people trusted his campaign as his goals were clear and he became first muslim immigrant to win the primary elections for Mayor of new york city. So, a dream must always be accompanied with specific goals to turn it into reality.

After setting clear goals, clear and well-defined plans must be made to start the journey of turning dreams into reality. These defined plans help to move and work hard with smart and direction centered approach. **The css-2022**

Topper, Talha Rafique Alam

stated in an interview that during his CSS journey he made a full-year plan and his plan included the target of each and every day of that year. This is how a well-defined plan is important to turn a dream into reality.

The most important thing required to convert a dream into reality is turning the plans into action and efforts. Without practical efforts no one can live his dreams. This can be viewed in efforts of founder of Pakistan **Quaid-e-Azam** who had put efforts by all means after he made the plan of turning the dream of a separate state for muslims into reality. The efforts and actions needed are the most significant things required to turn a dream into reality.

when a person starts a journey of pursuing his dream, he faces very obstacles in his path. He can achieve his dreams after overcoming all the barriers coming in his way. These obstacles include self-doubt, discouraging environment or situations, ^{and} financial restraints etc. The famous football player **Cristiano Ronaldo** lived very hard times during his journey. He belonged to a ^{poor} family with resources constraints but he never let these obstacles discourage him and continued his journey until he became the number one footballer in the world and started living his dream. Overcoming obstacles in a journey is a deciding factor in achieving dreams and success.

In the long

and hard journey of pursuing dreams overpowering one's own failures and setbacks is foremost requirement. In many efforts a person fails to succeed but these failures show the clear path if these are not taken as final. The writer of "**Harry Potter**" novel did not stop her struggle when all publishers refused to publish her novel for years. By overcoming these failures ^{one can} ~~she turned her~~ ^{one's} dream into reality, like she did.

Supportive Environment plays a huge role in journey of turning dreams into reality.

Pakistani aerospace engineer

Dr. Sarah Qureshi worked on a plane with carbon sink and invented her dream technology with support of her engineer

father. Therefore, one must surround oneself with supporting people as it paves the

way of converting aims into reality.

Innovation and creativity play crucial role in journey of following dreams. Not every journey is pre-determined and old. New kind of journeys require innovation and creativity that help in many situations. The **wright brothers, wilbur and orville** invented, built and flew the first successful airplane in 1903 with help of innovative and creative approach. So, creativity and innovation help a lot in journey of achieving something of dreams.

The people who never lose hope and motivation end up with success in their lives. In ^{any} rough journey with ups and downs, hope is the main driving force. Motivation is also equally necessary.

There is a common Islamic saying found in Quran which is interpreted as "**Believers do not lose hope in Allah's mercy**". This emphasizes the importance of hope and motivation for a successful journey.

To keep oneself motivated it is very important to celebrate small victories coming in process of hardwork. The journey of following dreams require hardwork and step by step following of plans. Therefore, small achievements must also be celebrated. This has positive impact on mental health, increases self-esteem and develops more positive outlook. Famous Cricket player **Steve Smith** used to award himself after his small achievements like ^{after} completion ^{his} completion of training, ^{after} winning a match etc. This

is how these Celebrations
make one more motivated
to achieve one's dreams.

After a long due
process of hardwork one
finally become able to live
his dreams. This ^{victory of} reality of
dreams also require hardwork
to maintain it. But the
achievement of converting
dreams into reality must
be fully ~~sup~~ celebrated.
There are many names in
the history who dreamed
and then achieved their
dreams with hardwork.

These successful dreamers
include Nelson Mandela from
Politics, Babar Azam in
Cricket, Umera Ahmad in
art and writing, Mahira
Khan in acting, Waseem
Badami in Journalism,
Adam Smith in Economy,

and Elon Musk in technology etc. These are a few names as history is full of such characters who turned their dreams into reality and proved that if you can dream it then you can achieve it.

Dreams and imaginations are foundation stones of every successful journey with clear visions, strong beliefs, defined plans and continuous efforts of turning dreams into reality. This journey needs powerful dreams, self-belief, clear goals and plans with actions, overcoming all kinds of obstacles and failures and staying continuously motivated. Role of innovation, ^{and} supportive environment also cannot be overruled. There is no doubt that individuals who dream big also achieve big. These individuals believe

in power of their dreams
and set them as inspiration
to work hard with believe
on their own talent. Dreams
come in brilliant minds to
mobilize those brilliant characters
and then end up with
reality of those dreams.

"The future belongs to
those who believe in
the beauty of their
dreams."

— Eleanor Roosevelt —
