8- You won't pass the essay if make more than 4-5 grammatical mistakes

9- outlines that are not self explanatory or does not aligned to with the essay statement are liable to mark 0 and the essay will become null and void

Language should also be improved

means to think about something to achieve it. It is the basic step to achieve anything. As if to achieve anything one needs to think first for it. But, there are some limitations to it. ~~where~~ One can dream to the extent he wants but unable to achieve everything he dreams. There are several reasons to it like societal pressure, financial conditions, little factor and even if some one have supernatural dreams. Dreaming in itself is a good thing but, at the same time in certain circumstances it is a bad thing as well. Its Advantages and disadvantages depends upon the consequences of it. Hence one can achieve his goals if he first dreams about it but, everything he dreams is not achievable due to certain hurdles.

Dreaming is the initial step to achieve goals. Without dreaming, one is unable to think about these goals. So, it is necessary to have dream first. ~~in order~~ When

a person dreams, he plans a process to achieve it. A plan is followed with well defined actions. Actions are basically set of habits. With consist habits a person achieves his dreams. Malala

Yousay Zai first had a dream to achieve education. Due to her efforts, she is successful in it and also providing guidance and support for girls education.

There are various hurdles to achieve a goal even while one dreams for it. As described above dreaming is the first step to achieve goals but there are some limitations which are described in below paragraph.

Societal factor is one of limitation to achieve goals even while dreaming. As one dream to choose a career of his own choice but, he is restricted due to either family terms or peer pressure. There is a girl name Sara, who want to become a singer. But, due to peer pressure and societal terms, she decided to pursue medical so it is a limitation to achieve goals

even while dreaming.

Besides societal factor, another important thing limitation is financial conditions. Even when, dreams match with the family terms but financial condition did not allow to pursue that dreams. Opportunities are not the same for the one who is rich while the other who lacks the money. For example, there is a girl who has a dream to get admission in medical in Agha Khan university. She gets good score in her entry test but, unable to manage the expenses.

Along with financial conditions, luck factor also plays an important role in achieving goals. It could be in anything. As it is important in achieving goals, it is also limitation in achieving goal. Two boys, prepared well for their exam in Pakistan army. Both of them cleared the exam with good marks while one got selected and other not is unable to make to

the selection due to the height factor. Due to short height, he got rejected. Even both dreamed the same and also worked for it.

Supra natural dreams are one of the most important limitation to achieve the goals. As supra natural dreams are its unachievable. So if even a person can dream he is unable to achieve it. A man told the news reporter that he has a dream to fly in the air without any support. He tried it but, he failed and got injured. Hence every dream is not achievable.

There are limitations in achieving a goal even when one dreams for it as they are discussed above. But there are advantages of dreaming as well which are discussed in the paragraph below.

Dreaming has many benefits as it broadens the thought process of one. So ~~not~~ dreaming gives a path to the future. It has a positive impact on one's life. It give a purpose to the

life. Without it, people won't do not
choose to live. For a healthy, purposeful
and hopeful life, dreaming is the
necessary element.

Along with advantages,
dreaming can also have disadvantages as
one can get hurt if there are dreams
are not met. Consequences of dreaming can
be worse if a person dreams to have
himself advantage only on the disadvantage
of others. It makes one selfish which
ultimately causes distortion in society.

In nutshell, dreaming is
the most important element to achieve
dreams while there are some
limitations like societal factor, economic
conditions, luck factor and supra-
natural dreams. So every dream is
not achievable. There are advantages
of dreams. It gives purpose to the
life. But there are also disadvantages
as it makes one selfish. In order
to achieve dreams, one must have
a plan over it but keeping in mind
that the dream is achievable.
