Introduction

“Climate change is a lot like death. We all understand it's inevitable, but few of us truly accept it.”

What is this?

(Brian McDermot)

Pakistan is struggling with the adverse impacts of climate change. Despite contributing only 0.9% of global house warming, it's one of the ten countries greatly affected by it. Many causes like green house effects, deforestation, industrialization and pollution have increased climate change drastically. It has impacted; economy, water availability, health and food resources. If global measures are not taken by countries, climate change can become an inevitable demise of humanity.
