

Paragraph (250 words)

"A thing of beauty is a joy forever."

Mankind in this world is blessed by Allah Almighty with some natural and artificial beauties; for the purpose that they may remember me and take joy from it. For instance, people go for picnic from different areas of Pakistan to the Northern Areas, including Naran, Kaghan, Swat and many more. People also visit to Murree and Margalla hills, with their families to get entertainment and joy. Allah Almighty has blessed us with this natural beauty forever so, that we can nourish our brain, body, and eyes. Similarly, we are also blessed with five senses through which we invented and discovered many

artificial beautiful things
from which we are
entertaining ourselves — electronic
gadgets like cell phone,
gaming PC, laptops etc.
are all the fruits
of artificial inventions.
Similarly, we have invented
cars and aeroplanes to
move from one place to
another without any
tiredness and frustrations
as we our ancestors
practice in medieval ages.
This beauty of science
is a source of joy and
happiness in our life.
Moreover, we are also
blessed with different
flavours of fruits and
food dishes from which
we are taking benefit
and joy. So, by taking
these beautiful things
into account such as
natural, and artificial
beauty, we and our
inheritor will take
joy from it forever.
