Self-fulfilment Vs Making Money

Making money is necessary for the livelihood of everyone however, it is not the primary goal for ~~every~~ all. Liking the sensation of making money is a natural emotion found in every person, but the monetary satisfaction is not the only thought in every person's mind. For the educated and intellects, money is important, but it comes second to the feeling of self-fulfilment which results from doing their work. Doctors save lives, soldiers win battles, clergymen spread the word of God as their profession. These tasks are a means of their earning but, the satisfaction of fulfilling a purpose takes priority over the money earned.
