Women Empowerment

Nation would neither succeed nor achieve its goal till its all individuals not works for the prosperity and economy of their country. The country to achieve its goals there should be an equal job opportunities, equal rights, equal law and study opportunities for women. ~~but~~ Women empowerment doesn't only beneficial for women but it also plays a significant role in country development. In Pakistan mostly professions which are associated with females are teaching, doctors and low category ~~jobs~~ professions because mostly people think that women should not be good enough to tackle complex and tough jobs and out of station jobs which is clearly a gender discrimination. However, in Pakistan there is also a women quota in PMA, PAF, Navy, Politics, Sports, PMS, CSS and NAB but there is still some quota seats are empty because mostly women are not allowed to ~~go~~ opt these professions. On the other hand, women who are in the profession of politics like Benazir Bhutto, in army like Nigar Johr, Malala Yousafzai and in literature Parveen Shakir are not only good in their profession but their efforts, resilience and struggles, plays a crucial role in country development. To

encourage women empowerment as there is an urgent need to generate equal opportunities for women in professions like politics, sports, media, digital working and also build more education institutes for women and also build awareness programs among peoples to enhance women empowerment.
