Title : Healthy Minded People

It's impossible that well-educated and generous man makes money his priority. All healthy people like money but money is not their main goal, their main object is to enjoy the moments of winning. A good soldier put his efforts to win battles, a clergyman's loves to preach and a well educated doctor main object is to cure their patient. Instead of making money, their main object is to win in their professions. So, the healthy minded person main goal is their job and fee is second. (86)
