

Title : ~~Work is First and Money is Second~~

~~Intellectual man does not~~ ^{intellectual men do not prioritize money} make money as his everything. Just like all healthy people does to their dinner. Money is not the object ^{wealth is not their primary goal.} rather it is something ^{that} healthy minded people like to make ~~it~~. A soldier wishes to die for ^{their} country or winning battles. A clergymen baptize and preach, a doctor cures their patient - all make their ~~money~~ ^{so achieving goals are more important than just accumulating money.} object and ~~not~~ money. ~~So money is~~ important but still second.

extraction of ideas is upto mark

need more focus on its presentation and more focus on word choice
