professionals prioritize money over wealth

~~Healthy Mindset's Approach.~~

Money can not be main theme of well trained mind's focus just as ~~to have an good diet is not the sole purpose of physically fitt people.~~

Although they like it, but it is not what they live for. A brave Soldier's passion is winning battles and a priest's main objective is to show the right path to people. Similarly, a good doctor will save a patient's life even if he is not paid for it.

Monetary Reward, in return is very important factor and everyone likes the feeling when it is rightly earn it but for a healthy mindset it is the achievement of their goals it is passionate involvement in work first.
