

WOMEN EMPOWERMENT

Although, women make half of the world population yet they are deprived from the essential/basic needs of life. In addition to, they did not

access to primary education and healthy life. According to

World Bank Report, percentage of working women in South Africa is very low. Education is the key for women growth and development. So government should

make education free of costs in schools and colleges. Moreover, develop technology for online access to education and lessen infrastructure and social economic barriers.
