Question #1

Translation

(A)

When the powerful economies of the world have affiliated the international economic system to their vested interests, economic dependence has become an elusive dream for under-developed countries. On the name sake of loan, International Financial organizations implement such conditions that further make the economy of indebt country dependent instead of advancing it towards stability. Regrettably, this process has given birth to a new imperial system in which currency, interest, and stock are used as weapon to reign rather than gun. Today, the biggest challenge for a modern-nation states is to maintain a balance between their development and self-dependency that does not make their national interests subordinate to international pressure.

(B)

Although modern technology has created advancement in human life, it has raised questions about personal freedom and human honor.

In the age of digital surveillance, every moments of citizens is getting stored in a data base. In fact, the governments and corporations are transforming this vast knowledge of information into a tool of power owing to which human behaviour can even be influenced. So, if this situation is not brought under effective moral and legal procedure, the human being of the future may be called highly free, but this freedom would only be a deception.
