A)

When the powerful economies of the world ^{have} made global financial system under their decree then economic independence of the developing countries has just become a dream. International financial institutions, on the name of bonds, imply such conditions which that push the indebt country's economy towards more dependency instead of the stable progress. This act has created a new colonial system where leadership's weapon is not a gun but currency, interest, and market. Today, the biggest challenge for world's nations is that they maintain such balance between progress and independency that their national interests don't come under international pressure.

B)

Where modern technology has facilitated human life, it also has raised new questions about self freedom and human dignity as well. In this era of digital supervision, every moment of citizens is being recorded in either of the databases. Governments and corporations are transforming this unlimited collection of information into such a resource which can even affect the human behaviors. If, this situation will not get controlled in civil and effective lawful manner then the man of future maybe called free, but his freedom will just be a drawd.
