Day: Thursday

Test - 3

Q1

Precis

Title: Wisdom Truly Fulfills Knowledge's

Purpose

0

The problem of the modern world is the presence of excessive knowledge and lack of its application. ~~However,~~

Human nature possesses more than just accumulating information. However, in the present times, people are in pursuit of gathering knowledge without actually determining its practicality. On the contrary, historical times had lesser information, but it was full of wisdom.

It is better for a person to use critical knowledge thinking on limited learning aspects than examining information with no purpose. Moreover, incomplete pieces of information create vague public opinions on complex matters, creating

✓

ambiguities. Technology further worsens it by provided fragmented, accessible information to people. In order to achieve wisdom, educators should limit the dissemination of knowledge to specialized areas. Hence, the true purpose of knowledge can be only achieved through its reflection and application.

Q2-

## Comprehension

Q1-

The author identifies the lack of quality in the time spent by a modern human. He describes their focus on the quantity of the time, revolving around the aspects of productivity and efficiency. This deprives them of the essence that time possess and its ability of providing rich experiences to humans. They

✓

are more concerned with time depletion and not the quality moments that make the time.

Q2- Ancients extracted meaning from time; whereas modern people are more concerned with its quantity. Ancient people classified time into sacred and profane time. On the other hand, the modern people have assigned uniformity to all the times. Hence, ancients live in the time, while the moderns count it.

Q3- "Thick time" is the idea of focusing on ~~the~~ spending meaningful time. It revolves around the concept of time that is inhabited rather than merely spent on productivity. It glorifies bonds, connections and creativity over ~~mechanical~~ efficiency, making it important aspect for humans.

to flourish. The psychological clock enables a person to reflect more deeply and differently than the mechanical clock.

Q4- This statement reinforces the concept of "thick time", as mentioned by the author. It conveys that a quality time enables a person to learn more about himself and the world

✓ Surrounding him than a quantitative time, which occupies mind on productivity. Quantitative <sup>mechanical</sup> time, in essence, signifies fleeting time. However, a human can create meaning to time by experiencing moments rather than by being distracted with it.

Q5 I think modern time management and productivity diminishes the quality of life. This is because modern time management prevents a person from

✓

3

✓

actually living the time. Rather, the human acts in a more robotic way, discarding the very essence of qualitative engagement, creativity and experiences. Modern humans are more depressive, as they have forgotten the ways of wise ancients who classified times. The quest to productivity has uniformly distributed times, inhibiting a person from really living 'the moment.'

Q3-
