Title → Green-technology: A deception

According to the author, public considers renewable energy as a solution of impacts caused by fossil fuels. However, elites use terms like carbon neutrality and net zero as they are the earth heaters, but in real the "green revolution" itself is a planet destructor. Moreover, rare-earth minerals are utilized in clean-technology, causing adverse effects in the countries from which they are being extracted. During the production of green-technology, more carbon emits than the engine productions. Because in the process of production of clean-technology fossil fuel is used and when expired contributes to toxic wastes. In order to overcome one environmental problem another

is being use introduced; therefore,
zero-emission is mere a slogan. Thus,
the sustainability is possible through
systemetic approach.

his discourses are timeless.

Q# 03

Comprehension

Q1)

Timothy Dexter's rival advised him to ship a coal to Newcastle, a city famous for its immense supply of coal. His rival was jealous of his success and wanted to humiliate him. However, when he reached the city, they expected to mock him and make him a immense loss in his business. But his misfortune turned into fortune.

Q2) In the city of England when Dexter shipped a cargo of coal, to in the suggestion of his rivals, the local production of coal stopped and a sudden shortage outburst. Therefore, Dexter sold his entire cargo of coal that transformed his apparent foolish coal venture into a profitable success.

Q3) The author implies that the Dexter was not only a lucky but an intelligent man. He, always makes strange decisions but somehow turns into success. Because he businessmen of the materials which were the need of the hour. Example he shipped cats to the city, where they were used to control rats.

Q4) The Dexter's repeated success challenges conventional ideas about business on the basis of wisdom and education. His success emphasizes that

sometimes unconventional ways
with little formal education
a person can achieve success.

Q5) It is inferred that humans
are biased. When anybody
does something, first people
will laugh and underestimate
until he succeeds. In the case
of Dexter it happens in the
same way, his rivals mocked
him and suggested a foolish
idea and humiliated him. When
he succeeded all became speech-
less.

- Q4)
