Topic: Dark side of Green Revolution

Renewable energy is shown a good alternative for fossil fuels. Different influencers brandish terms related to green revolution hiding the truth. Each clean technology require rare earth minerals. The extraction process requires extensive energy while leaving in habitable land and creating another crisis. Similarly, battery production for electric vehicles emits more carbon than traditional engine production. These batteries expire after limited ("timespan") time span leaving huge waste. Wind turbines and solar panels also leave waste that cannot be recycled. But their production and maintenance depend upon fossil fuels. This is a moral problem as green

Labels are being used for marketing not philosophical awakening. The solution lies in controlled use of fossil fuels not in harming the planet in some different way.

Q. 1:-

If an Urdu's professor announces that he understands Ghalib's poetry well and he can impress anyone by discussing its technical aspects. No doubt, he is flexing his knowledge muscles but if you demand him to say a line like Ghalib, he will freeze. Because, creating and understanding the creation are two different things. ~~the~~ While understanding comes from wisdom; creation comes from spiritual state and reveling. Ghalib did not reach so far by just reading or by hardworking but it was the result of extraordinary mindset, sensitivity and God's gift. That's why, his words even after a century, leave the same impact as in his age.

The prisoner looked through the narrow window and said, "They call this justice yet I have never been heard." The guard replied softly, "Orders are orders sir, freedom isn't decided here." A journalist, outside, shouted, "The minister claimed, 'no one is above law', but who decides what law means when truth is behind bars." The cell fell silent. The prisoner smiled faintly and whispered, "They cage a man, but not his conviction."
