

Q#02: precis of the following passage
and suggest a suitable title.

Title:

Renewable Energy: Another Source of Pollution

People think renewable energy is a good alternate of fossil fuel. Politicians, Corporation and Environmentalists like 'neutrality' and 'net zero' term but the green revolution also damage the planet. Wind turbines, Solar panels and electric vehicles have hidden costs. "Clean" technology demand minerals that are extracted through worst mining practices. Electric vehicles consider as environment friendly but their batteries production causes more emission than conventional fuel. Short life span, recycling and dumping ^{electronic} waste are another challenges. Blades of turbine can not be recycle and solar panels produce toxic waste. Transport, assembly and grid support of these eco-friendly products depends on fossil fuel. "Green labels" obsession turn environmentalism into marketing enterprises. But Sustainability never demand another wave of exploitation.
