

∴ Question:-5:

A- Paraphrase the following passage.

The prisoner looked through the narrow window and said, "They call this justice, yet I have never been heard." The guard replied ~~silly~~ softly, "Orders are orders, Sir freedom isn't decided here." A journalist outside shouted, "The minister claimed no one above the law, but who decides what law means, when ~~truth~~ is behind bar?"

The cell fell silent. The prisoner smiled faintly and whispered, "They can cage a man, but not his conviction."

B. Re-write the following sentence (only five) after filling in the Blanks with appropriate Preposition.

Ahsan doesn't want to study, nor does he want a job.

∴ Question :- 3 ∴

Read the following passage carefully answer the following questions.

- 1- Why did Timothy Dexter's rivals advise him to ship coal to Newcastle, and what was the intended outcome of this suggestion?

The Timothy Dexter's rivals advise him to ship coal to New Castle, England, a city which was already famous for his enrichment in coal, just to humiliate him but luck had his other plans which somehow turned into fortune.

- 2- What unexpected event in England transformed Dexter's apparently foolish coal venture into a profitable success?

Dexter's apparently foolish coal venture became profitable due to an unexpected miners' strike in Newcastle. The strike halted local production, creating a sudden shortage and high demand, which allow dexter to sell his shipment at a massive profit.

3- What does the author imply about the relationship b/w luck and intelligence in Timothy Dexter's success?

The author implies that Dexter's success is the combination of luck and instinct rather than formal intelligence. His unusual business decisions often succeeded due to unforeseen circumstances, suggest that luck can sometime outweigh conventional intelligence in achieving success.

4- How does Dexter's repeated success in turning mockery into profit challenge -----?

Dexter's repeated success in turning mockery into profit challenges the conventional beliefs that business success requires formal education, rational planning and ^{having} confidence of taking risk. Sometimes achieve what traditional wisdom cannot.

5- How can be inferred about human perception of "foolishness" and "genius" -----?

The rivals' reactions reveals that society often misjudges "foolishness" and "genius". People tend to mock ideas which seems illogical, but when these ideas succeed, they are reinterpreted as signs of intelligence.

Question :- 2 :- : Precise :

Title :- "The Hidden Cost of Green Energy"

Renewable energy is seen as a moral and environmental solution, yet it hides serious problems. The making of solar panels, wind turbines, and electric vehicles needs large amount of rare minerals like lithium and cobalt, mined in poor regions through harmful and polluting methods. These so-called clean technologies still depend on fossil fuels for production, transport, and maintenance. Their batteries and blades are hard to recycle and turn into toxic waste, adding to pollution. Thus, the green revolution is solving one crisis by creating another. Real sustainability means using resources wisely and living simply, not hiding pollution behind green labels.

: Question :- 7 :-

Translate..

If any professor of Urdu claims to have a deep understanding of Galib's poetry and can give a brilliant lecture on its technical merits, then he is showing his academic prowess undoubtedly. However,

he would be clueless, if he is asked to compose a single stanza like Ghalib. This is because narration and creativity are two different things. Narration is the intellectual product while creativity is a result of intuition and inspiration. The place Ghalib achieved is not just due to his hardwork and study but due to his intellect power, emotion and divine mercy. This is why his poetry is effective & influential in hearts, just like they did in his own time after centuries.
