

PRECIS

"GREEN REVOLUTION:

A DELUSION"

The author says, people think that renewable energy is a conservation of biodiversity for humanity, good replacement of fossil fuels. Politicians, environmental activists & corporates just do promises but not fulfil them, to save the planet, they just like to say the slogans carbon neutrality & zero emissions.

Behind there is nothing like that to save the damaging earth by green revolution.

The sad truth is to gain benefit at the cost of others. Resulted by increasing solar panels, wind turbines,

and electric vehicles conveniently hide the struggle behind them. Gaining all these by mining for minerals, Cobalt, Lithium etc. Congo, Chile, and China also leave vegetation by adding poisons chemicals, at the name of sustainable materials.

The batteries used in electric vehicles are more dangerous and carbon emitting than the ordinary batteries, and less efficient in performance.

The solar panels and wind turbines may look so clean operationally, but the material is unrecyclable in turbines, and add repair & damage solar also require fossil fuels for transport.

making the slogan "zero emission" a delusion.

It is not just the technological fault but human

obsession with "green labels" using for business not for realizing the sustainability demands. It is industrialization in disguise. The planet is not healing but more damaging, in blanket of renewable energy.

Q3 Comprehension

Answer : 1

Timothy Dexter's rivals wanted to degrade him because of jealousy. So they suggested him to ship coal to the Newcastle, a city in England.

Date: _____

M T W T F S

The rivals thought that Newcastle is already famous for the supply of coal in large amount, so he will face lose because there would be no need of coal as there is already present in huge amount. But when Dexter's ship arrived at the port, at that time there was a strike of minner's which resulted in a shortage of coal in the Newcastle, he sold the whole cargo for a massive amount. His rivals suggestion resulted into a huge profit instead of a lose, leaving his rivals speechless.

Answer : 2

Date: _____

M T W T F S

The minner's strike was the unexpected event which resulted in the shortage of local production of coal, transformed the foolish decision given by his rivals to Dexter turned into the one of his biggest success.

Answer : 3

The author imply luck and intelligence both are success factors in Timothy Dexter's life. He was known as a genius and a fool at the same time because of little education people thought him as a fool but his confidence lead him to success as the luck works with confidence and

Date: _____

M T W T F S

confidence comes from
intelligence that he
believes in himself.

Answer : 4

Dexter's success comes from
his confidence and his
knowledge about the
business. He sometimes
takes unexpected decisions
which lead him to profit
his ideas about the
business was his wisdom
but not the education
because wisdom comes from
education and knowledge.
It is just his confidence
and extraordinary decisions
experienced him to earn
profit.

Answer : 5

Dexter's rivals reaction to

Date: _____

M T W T F S

his achievements show that foolishness is not always in negative sense, sometimes foolish decisions can lead to the most success. Uneducated does not mean that the person is fool, knowledge comes from observations and experience. Genius is something that is called to be genetical or by birth. Dexter was fool and a genius at the same time, and his rivals does not saw his confidence and luck that he had. As the famous saying: "God help those who help themselves".
