A-

Punctuate passage:

The prisoner looked through the narrow window and said, "They call this justice yet I have never been heard." The guard replied softly, orders are orders! Sir! Freedom isn't decided here. A journalist outside shouted, "the minister claimed no one is above the law"; But who decides what law means, when truth is behind bars." The cell felt silent, the prisoner (sighed) smiled faintly, and whispered, "They can cage a man, but not his conviction."

QNO6

Use words into sentences

Q not

Translate

If anyone Urdu's Professor would claim that he can well known about the verses of Galib then he could eloquent speak on his art scripts, he ~~do~~ would definitely show his knowledge capabilities, however if closely examined he could not say a verse like him, he would be helpless. Because knowledge and creations are two different words. Knowledge is the productivity of intelligence, however creation is upshot of God gifted revelation.

The status Galib had received it is not only the repercussions of study and efforts but also the ~~overperfect~~ displays of super intelligent, benef. benevolence, and Godgiver.

This is the reason that after a long period his poetry inspired similarly as it did since before

QNO3

Question / Answers of a passage
QNO1

Why did Timothy Dexter's rivals advise him to ship coal to Newcastle, and what the intended outcome of this suggestion? Timothy Dexter's rivals got envy with her and wanted to downfall his business. Therefore, they advised him to ship coal at that place where surplus amount of coal was available. However, when his ship reached in England at that time there was a short fall of coal due to miners strike for local production.

QNO2

How does Dexter's repeated success in turning mockery into profit challenge conventional ideas about business wisdom and education?

Dexter's repeated success in turning mockery into profit challenge conventional ideas about ~~as~~ business wisdom and education. Because, he got formal education however whatever the business he did either supplied coal, fed waumers to Caribbean and cats to west Indies. All

these proved versatility for him. Although, he supplied to that area where all these things were in surplus amount. But, he got success in every business he did.

QNO3

What unexpected event in England transformed Dexter's apparently foolish coal venture into profitable success?

Ans: The unexpected event in England transformed Dexter's apparently foolish coal venture into profitable success. He had supplied coal to that area where already in ample amount. However, when his ship reached there meanwhile shortage of coal occur because miner's strike stopped the local production.

QNO4

What does the author imply about the relationship between luck and intelligence in Timothy Dexter's success?

Ans: The author imply about the relationship between luck and intelligence in Timothy Dexter's success was just a windfall. He took senseless decisions by supplied to areas where already available in excess. But, all these

decisions proved valuable for him. Therefore, in Dexter's case luck dominates over his ^{minor} intelligence.

Q1005

What can be inferred about human perception of "foolishness" and genius from the way Dexter's rivals reacted to his achievement?

It can be inferred about human perception of "foolishness" and "genius" from the way Dexter's rivals reacted to his achievement. When your luck dominates then apparently foolish thing or an act converts into sagacious decision.

Q1002

Make a precis of the following passage

The Effects of Renewable Energy on Environment

Public perception that renewable energy can reverse fossil fuel effects is partially true. Politicians and environmentalists uses net emission to show its positive impacts. However, reality is different as green revolution is another step towards emission.

These green energy devices itself demand huge costs. Every clean technology needs rare-earth minerals that are extracted through energy consuming mining practices. The fertile lands become toxic through these eco-friendly materials. Similarly, wind and solar plants are clean in mechanism but, their infrastructure required toxic, non-renewable materials. Their maintenance depends upon the transportation of these materials by using fossil fuels. This green energy is just for flourishing business instead of reflecting about reality. It requires effective sustainability instead of another way towards industrial revolution. The planet not only requires renewable energy but also some other way to clean it.
